

COMPANY PROFILE

Blue Ridge Plastics

blueridgeplastics.com**ABOUT**

Blue Ridge Plastics is a full service plastic recycler with extensive experience in providing recycled materials for pipe, plastic lumber, sheet, profile extrusion, compounding, rotational molding and injection molding applications. Our staff at Blue Ridge Plastics has extensive experience in recycling plastic. We shred, grind and wash post consumer and post industrial plastic to produce clean, dry "process ready" regrind. Our washing technology is capable of removing the most difficult contaminants. We operate five grinders and three wash lines at our 140,000 square foot plant. With our diverse equipment, we are capable of handling both large and small jobs.

Blue Ridge Plastics is a full service plastic recycler offering nationwide services in the US and Canada. Toll Services Blue Ridge Plastics is a trusted buyer of all forms of thermoplastic scrap, PE & PP regrinds (all melts and densities). We make it easy and profitable to recycle plastics. Whether you are interested in converting your scrap into new materials or selling it, we can help improve your bottom line.
