

COMPANY PROFILE

Confidential Data Disposal

cddshred.com

ABOUT

CDD Shredding is a mobile data disposal service that provides on-site destruction of confidential documents. Their service ensures information security and peace of mind, while also being efficient and cost-effective. They emphasize the importance of not throwing out outdated confidential documents as trash and highlight the inefficiency and hidden costs of using office shredders. CDD Shredding's mobile service is 30 to 50 times faster than using an office shredder, allowing employees to focus on other tasks.
