## ABOUT

Cor Compost is a compost service company that provides an environmental approach to waste management. They offer weekly services for restaurants, schools, businesses, and homeowners who want to reduce their carbon footprint. Cor Compost collects food waste and other organic materials to create nutrient-dense natural soil through the process of composting. This compost can be used to nourish and protect soil, conserve water, reduce greenhouse gases, and decrease the need for chemicals. Cor Compost aims to revolutionize the farm-to-table movement by closing the loop and returning table scraps back to the farm. They believe that 50% of our trash is compostable and can be transformed into valuable resources. Visit their website for more information and to explore their services, market updates, and shop.
