

COMPANY PROFILE

DISCOVERY RECYCLING

discoveryrecycling.com

A B O U T

At Discovery Recycling we are passionate about making a difference in the world around us. Its not just about being green and saving the planet. We are about people and community. The people of the Wiregrass area are our neighbors and friends. Small business recycling Corporate recycling industrial recycling Waste Audit We except all CardBoard at our Recycling Center. You may conveniently drop off during business hours.We can schedule a pickup time to collect your used household items and Card Board boxes that fit our description of "What to Recycle". We will collect household items such as electronics, or anything that has Metal on it. Example: a broken entertainment system that is made of metal and wood, lamps, broken microwaves, swingsets, computers, telephones, etc. E-waste is one of the largest growing problems we face. Most electronics contain metals and chemicels that can harm people and the environment. Land filling E-waste is not the solution and back yard scrapers can create a mess and hazard. The solution is a solid E-waste program. Millions of computers are thrown away every year. The computers can be recycled into new products.At Discovery Recycling we have helped businesses and individuals recycle printers, CPU's, cords, and many other electronic. We are committed to keeping E-wast out of the landfills. Residential waste audit Education is the key to a successful recycling program. The private residence generates thousands of pounds of waste every year and most of that waste can be recycled.By recycling your not just helping the environment. You are creating jobs and commerce. The more informed the individual residences are the more successful the recycling program will be.Our waste audit starts with education. Remember that recycling is not just about collecting the materials that would otherwise go to the landfill. Recycling creates jobs for sorters, managers, truckers, skilled labor to create more new products, packagers, and retailers. Items that we recycle Ideas for setting up a home program how to prepare items Items that can be reused Setting up a recycling plan
