## A B O U T

In 1954, Harvey Dulin, founder of Dulin Metals Company (DMC), set out to develop long-term relationships for one of the most progressive family enterprises in the secondary scrap metal industry. These relationships became the most important asset in forming a successful network between metal suppliers and consumers. Since its incorporation in 1978, DMC remains at the forefront in developing 21st Century technologies and systems to meet industry's growing challenges. Today, we continue to build upon our founding goals of customer commitment, consumer confidence, business stability, and disciplined business ethics. DMC's business values emphasize responsive reliability to compliment our comprehensive service in meeting your scrap metal requirements. Quality DMC is equipped with a state-of-the-art laboratory that enables alloy verification to assist in meeting consumer specifications. This capability encourages cost effective processing when evaluating, sorting, and upgrading scrap. Processing Our environmentally controlled de-oiling system allows us to upgrade material with in-house cost controls. This service benefits stampers who utilize generous cutting fluids in their operations. Marketing Our marketing experience encompasses open market, mill return, and toll programs. Each program is customized to meet individual company's needs. These strategies offer market options for price flexibility and protection against volatile metal markets while maintaining price integrity and financial stability. Logistics Dulin Metals' transportation department combines its own truck fleet with common carriers to respond to customer-driven scheduling. Our routing procedures enable us to combine large and small shipments to minimize freight costs and maximize material value. There are no metals that Dulin Metals Company (DMC) has not worked with at some point in time and our commitment to versatility guarantees we will have answer for your product. Although specializing in high-performance alloys, DMC also processes and manages many base metals for our list of clients, as well. DMC understands the industrial manufacturing process and is prepared to handle the bi-product and scrap of any

operation.
