

COMPANY PROFILE

Ecology, Inc

1800myscrap.com

ABOUT

Ecology, Inc is a full service recycling business with two locations, St. Charles Scrap in West Chicago, IL, and Lake County Scrap Metal in Prairie View, IL.. We pick up scrap for recycling from the public and industry in the Chicagoland area and surrounding suburbs, southern Wisconsin, and northeastern Indiana. Everyone is welcome to bring scrap to either of our locations, each of which is a full service recycling facility. For material brought to us, our method of payment is cash, unless a check is requested. Our prices are always the highest for current market conditions. We also supply containers for industrial accounts for receptacles for your scrap. We offer recycling program consultation free of charge. We set up complete recycling systems in your plant, including offering discount pricing on new and used balers for baling up your waste paper or cardboard. Balers We represent many different brands of balers, and can offer them at discounted prices. We recommend the best baler for the application, not just one brand. As a reseller of new and used equipment from many different manufacturers, we are able to offer discount pricing, especially to customers who want us to purchase their bales. (We also offer discount pricing on baling wire for these machines.)
