## ABOUT

Fairfield Core & Recycling was started by two brothers with a vision to run a successful small family business and employ some local people to grow with us. We want to offer a good local workplace for our employees and a friendly competitively priced location for customers to recycle their scrap metals. Our first recycling location, Perry Scrap Yard, was opened in 2012 and we opened our second, Fairfield Core & Recycling, in 2013. We currently work with 16 full and part-time employees.
