

COMPANY PROFILE

Fremont Industries

fremontind.comABOUT

Fremont is a family owned business founded over 60 years ago and continues to be a leading water treatment company today serving the Central and Midwest regions of the United States. As a privately held water treatment chemical company, we manufacture industrial, municipal and governmental water treatment chemicals. Our company specializes in programs to prevent scale and corrosion in both heating and cooling systems. Fremont's expertise also includes waste water applications and Ethanol services. Fremont is a full service company providing all your water treatment solutions with a qualified laboratory and team of trained chemists for analysis of water, deposit and metal samples. At Fremont we are committed to providing excellent customer service and high quality products designed for specific applications. Our commitment to high standards is shown by being the first American specialty chemical manufacturer to receive ISO 9001 certification. Experience the Fremont Difference today. Visit our website <http://www.fremontind.com/> or call us at (952) 445-4121.
