

**COMPANY PROFILE**

# G. Phillips & Sons, LLC

[gpsrecycle.com](https://gpsrecycle.com)**ABOUT**

G.P.S. is a family owned and operated sustainability business. Our desire is to grow a great place to work for our employees and be a great entity for our suppliers and end customers to conduct business with every day. G. Phillips and Sons is a family business named to honor the family's material grandfather, Gordon Phillips. Mr. Phillips never accumulated much in terms of earthly riches. However, he taught the Harding family how to know and love God, how to love and treat their spouse and how to live life to the full by finding joy in all God's blessings. This business is about our children and their children, to that end, we desire long term mutually beneficial partnerships with participants along the sustainability spectrum – from scrap producers to recycled resin consumers – from brokers to processors—we are here to stay for the long haul and we build on that idea with every email, phone call and deal we do. We want partners who share that vision. We recycle; buy and sell multiple types of plastics and OCC. G.P.S. has locations in Alabama, Georgia, and Ohio.
