## ABOUT

Gator International is a company based in Penticton, BC that specializes in manufacturing microbial bioremediation products made from cotton. Their products are certified by the United States Department of Agriculture as 100% biobased. Gator International offers a patented technology called Oil Gator, which is a recycled product made from a waste product produced by the cotton industry. Their bioremediation products are used to absorb unwanted hydrocarbons and provide a sustainable solution for managing hazardous waste. For more information, contact Gator International at [email protected] or (250) 493 3635.
