## ABOUT

Recycle all your computers, electronics, appliances and batteries Recycle Your Styrofoam, Corrugated Cardboard, & Fluorescent Lamps Tiny CheckMark Secure On-Site Hard Drive / Tape / Floppy / CD & Paper Document Destruction Tiny CheckMark Downstream Strictly with R2 or e-Stewards Vendors Tiny CheckMark Absolutely No Overseas Shipping to Developing Countries Tiny CheckMark 100% Domestic CRT Leaded Glass Recycling Tiny CheckMark Certified On-Site Refrigerant Evacuation of All CFC Devices Asset Tracking Full Reporting of Assets, Including Make, Model, and Serial Numbers. Hard drive serial numbers are recorded, and a certificate of recycle can be issued upon request. Complete Tear Down / Value Recovery All Ewaste is Disassembled Right Down to its Basic Components. These components are sorted and separated, then harvested for the raw commodity. For example, insulated wire and cables are chopped and the granulated copper is separated from the pvc material, producing a 99.9% clean product. The granulated copper is then sold back into the market and the rubber and pvc plastic granules are sold directly to plastics recyclers. Data Destruction Data Security Continues to be a Major Concern With Customers. That is why we take extra precaution to secure all hard drives at our facility, and when ready, all end of life hard drives are physically destroyed, preventing your data from getting out. In addition to Hard Drive Destruction, we also shred all tape, floppy, and disc media, as well as sensitive paper documents. Regardless of media, you can rest assure your data will be physically destroyed before it leaves our facility! We guarantee your data will be destroyed, and can provide that guarantee in writing. Refrigerant Recovery & Recycling Professional Removal of all Refrigerant from Air Conditioners, Dehumidifiers, Refrigerators, etc by Certified Technicians so that it can be Properly Recycled. R22 is the most frequent type of refrigerant found in today's CFC & HCFC devices and has a global warming potential of 1,800 times that of carbon dioxide. Cathode Ray Tubes Strictly Domestic Recycling & Refining of all CRT Glass. The lead in the tube is

extracted via a patented process and later able to be re-used in other applications such as batteries while the glass components are recycled and sold to manufacturers for other glass applications. All processing is performed right here in the United States. Fluorescent Lamp Recycling Controlled Crushing of Fluorescent Lamps of Any Length into 100% Recyclable Material While Capturing 99.99% of the Mercury Vapors Released. This is done via a 3-stage filtration process which removes hazardous particulates and gases. All in strict accordance with EPA, OSHA, and Mass DEP regulations. We arrive with lockable containers and collect your confidential hard drives. We record each drive's make, model, and serial number for later reporting. Drives are crushed in such a way as to render them physically inaccessible. We provide a Certificate of Destruction with a listing of all hard drive info. HD scrap material is sent to our eStewards partner for further recycling.
