## ABOUT

Green Mountain Compost is a local and sustainable company that specializes in creating high-quality soils using natural, local ingredients. They offer bagged products at premier garden centers across New England, as well as bulk compost for local delivery or pickup. Their soils are fully mature and tested in growth trials to ensure optimal results. Green Mountain Compost is committed to producing healthy soils for healthy communities, without the use of chemicals or pesticides. They also provide composting services, where they turn food scraps, leaves, and yard debris into nutrient-rich compost instead of sending them to the landfill. Since 1987, they have been dedicated to reducing waste and feeding local lawns and gardens.
