## ABOUT

Maine Environmental Laboratory performs analyses on samples of all kinds: drinking water, wastewater, soils, sludges, ashes, and more! Our clients range from large scale industries and organizations with regulated discharge permits to homeowners who want to ensure their well water is safe to drink. We welcome all new and returning clients to our lab, and we will work with you to get you the data you're looking for. Please contact us to discuss any testing needs we offer many testing packages and
