

COMPANY PROFILE

McGill Compost

mcgillcompost.comABOUT

McGill Environmental Systems provides industrial composting, compost products, and organic waste management solutions focused on sustainability and cost savings. With over 30 years of experience, they design and operate industrial scale ASP facilities to manufacture premium compost products from biodegradable waste. Their services include B2B, B2G, PPP/P3 industrial services, organic waste solutions, organics recycling, compost manufacturing, mobile dewatering, compost sales & marketing, transportation, facility solutions, facilities design, build, operate solutions, facilities management, and municipal solutions. McGill Environmental Systems transforms organic waste into enriched soil amendment products and blends to promote greener practices for industrial waste generators, public entities, and the environment.
