A B O U T

Metro Group, Inc. is a premier Utah scrap metal recycling & transloading company. Family owned and operated since 1976, we are committed to providing quality customer service with unmatched integrity. Metro Group provides both drop off recycling services located throughout the Wasatch Front and recycling container services for industrial, manufacturing, and fabricating companies that produce scrap metals through their day to day processes. In addition, Metro Group also offers on-site or mobile clean-up solutions for businesses, farms/ranches, or industrial sites. The scrap metal recycling industry is older than most people realize. In fact, the industry as we know it today literally began over a century ago with humble businessmen pulling handcarts full of recyclable scrap material. Today it is at the forefront of America's (and the World's) emphasis on sustainability and re-usability. Millions of tons of material are recycled every year saving energy, green house emissions, and raw materials. How can Metro Group, Inc help you today? Choose from one of our recycling services. Transloading is the process of moving material from one form of transportation to another. For example, imagine you are bringing in some building supplies from the east coast. You discover you could be cutting transportation costs by using rail instead of trucks, but you don't have rail access on your property. This is where Metro comes in. Your material gets shipped to Metro Transloading where it is unloaded from the rail and reloaded for delivery by truck to your doorstep, saving you time and money. We also offer storage of material for later delivery. Metro Group offers a top notch scrap metal container service. We place the container at your facility, you fill it up, we pick up the container and you get paid. We own all of our own trucks and containers, which means you get fast, professional service without any of the hassles of dealing with a middleman. The Metro Transloading facility in Salt Lake City, Utah, boasts 5 total acres, 3 rail spurs and 32,000 sq. feet of weather protected storage space. Here are a few more reasons to consider using Metro Transloading: Metro Group, Inc can help you cleanup your farm or warehouse. Our On-Site Cleanup

professionals can come in, cleanup your site and haul the metal away for you. Leaving you more time to get your work done. We typically pay for the metals we pick-up/haul off. Pricing depends on tonnage, preparations need to remove from the site, freight, non-metallic attachments and labor costs.
