ABOUT

Nakolinnan Rauta Oy is a modern scrap shop that sells both new and old goods. We recycle metals to Finnish metal processing plants. Used irons are available in black, galvanized and primed. And if there is no suitable iron pre-primed, we will deliver the irons to the desired readiness with the help of our partners. In addition, we have a disconnection service, so you always get a product of a certain size and you don't have to pay unnecessarily. We also have galvanized and acid-resistant chains, shackles, buoys, Liros ropes and a wide range of other small items, both galvanized and acid-resistant, for boaters.
