

## COMPANY PROFILE

# North American Alloys

[northamericanalloys.com](http://northamericanalloys.com)ABOUT

Now celebrating our 32 nd year in business, North American Alloys was founded in 1983 by Michael Shulimson in Los Angeles, California. North American Alloys processes titanium and nickel alloy scrap for recycling and warehouses stocks of new and surplus lots of titanium mill products. North American Alloys warehouse in Kennewick, WA handles titanium sheet, plate, bar, billet and tubing. North American Alloys is always seeking new sources of excess inventory materials in titanium, cobalt or nickel alloys and specialty metals such as tantalum, columbium, zirconium and beryllium. North American Alloys is a proud member of these organizations. North American Alloys is always interested in purchasing excess inventory materials and surplus usable goods in titanium, nickel and cobalt alloys. We also purchase titanium alloy scrap for recycle and specialty alloy materials.
