## ABOUT

NWISWD (Northwest Indiana Solid Waste District) is an organization that focuses on managing solid waste in the Northwest Indiana region. They provide various services and programs to promote waste reduction, recycling, and proper disposal of waste materials. Their services include educational programs, recycling collection events, and assistance with waste management planning. NWISWD also works with local communities and businesses to develop sustainable waste management practices and improve environmental stewardship. Overall, NWISWD aims to protect the environment and enhance the quality of life in Northwest Indiana through responsible waste management.
