

COMPANY PROFILE

Planet Waste Paper

wastepaper.com

A B O U T

It has been said, "One Man's Trash is Another Man's Treasures". At Miami Waste Paper we do not profess to turn your waste paper into gold or diamonds. But we can take your unwanted paper and cardboard and turn it into cash. With a customized paper recycling and cardboard recycling plan for your business we can show you how to reduce the cost of your bulk hauling, and actually pay you to pick up your cardboard or paper, while saving hundreds of thousands of trees in the process. Miami Waste Paper has a proven track record built on a 60 year reputation for honest and integrity in the Waste Paper Recycling industry. We are recognized experts in creating maximum value and increased revenue with all grades and types of cardboard and scrap paper, from corrugated packaging to office waste. For more than 60 years Miami Waste Paper has been making a difference in our community. In 1944 a time when few people even heard of the word "recycle" entrepreneur Roy Kopstein began picking up the discarded cardboard boxes that held the boots and uniforms of the boys going off to war. He started recycling them to do his part for the war effort, and Miami Waste Paper was born. In the many decades since MWP has dedicated itself to minimizing the waste in landfills, reducing deforestation, and protecting the environment by developing recycling programs for businesses that not only improve the planet, but also a company's bottom line. Customer service is a core value of Miami Waste Paper. We are proud to number among our many satisfied clients several well-known area hotels and hospitality chains. Restaurants, supermarket chains and "Big Box" retailers throughout the area are turning to Miami Waste Paper to help them comply with Miami-Dade County's recycling requirements, and to show them how to turn trash into profits. Our long list of satisfied clients understands that MWP offers numerous options for hauling and processing their recyclables, and has solid experience in all aspects of the recycling business in both the domestic and export markets. At Miami Waste Paper we can handle your Cardboard Recycling, Paper Recycling, and Other Materials. It does not matter how much or how

little of this material you generate. Contact us today for a free assessment of how we can make recycling work for you. Cardboard Recycling Did you know that more than 90% of all products moving across the United States are shipped in corrugated packages? Understandably, old corrugated cardboard (OCC) therefore makes up a large percentage of the solid waste stream. And almost all of that comes from the non-residential or industrial sector. OCC takes up a lot of space in dumpsters because of its bulk. It is unwieldy and adds to your bulk hauling costs. The most cost efficient way to recycle Cardboard is by placing one of our balers on site. At Miami Waste Paper we can show you how businesses just like yours have profited greatly by putting one of our balers onsite. Cardboard recycling just makes sense.
