

COMPANY PROFILE

Pucketts Recycling

puckettsrecycling.com

A B O U T

Pucketts Recycling has been servicing the Twin Cities since 1971. Everyday we strive to service our customers with a Midwest, blue-collar mindset. We are still on the same mission as we were in the beginning: To make recycling affordable for all businesses, and we aim to lower the cost of service and provide alternative recycling options to accommodate each customer. We provide weekly, monthly, and on-call pickups. We specialize in hauling baled cardboard, loose cardboard, and our bundled cardboard. More often than not dumpsters need to be serviced too frequently, resulting in significant service charges. Pucketts Recycling has created a solution for those Big Bulky Dumpsters in your parking lots! Our Bundler units allow anyone to bundle their cardboard and reduce recycling charges by limiting the number of pickups needed! Our bundlers go far beyond the idea of just adding new business. We've developed these with a small footprint/green initiative in mind since the start. Our philosophy will always be focused around efficiency and making the World a cleaner place for generations to come. Since the early 70's, Pucketts Recycling has been a company with a focus on making the Twin Cities a cleaner, healthier, and more beautiful place to live. Our background has always been in paper and cardboard material recycling, but we've also recycled, glass, plastics, metal, and other materials. We've always operated low impact fuel efficient trucks. The benefits of these smaller commercial recycling trucks allows us to consume less fuel, averaging 10 – 14 mpg across the fleet (compared to an industry that averages below 5 mpg). Our trucks also have less impact on parking lots as well as a less obtrusive appearance when servicing our accounts. Being a small family run company we are always looking for smart and efficient ways to allow ourselves to be more competitive in a "big business" world. 2012 Pucketts Recycling recycled nearly 4 million pounds of cardboard and paper...on pace to tip over the 4 million pound mark in 2013!
