## ABOUT

Slurry Systems Company is a professional nutrient management company that offers custom pumping services, including drag hose, booster pumps, and semi transport. We specialize in complete turnkey projects, handling everything from land acquisition to permits and compliance checks. Our land application services utilize Yetter coulters for minimal soil disturbance, and we also offer closure disk or wheel options for complete trench sealing when dealing with wastewater. Additionally, we provide broadcast options for surface application, with a delivery width of 55'. Our services are commonly used for backwash sediment ba.
