

COMPANY PROFILE

Steel City Metals

steelcitymetals.comABOUT

Steel City Metals is a metal recycling company that offers a wide range of services. We specialize in helping individuals and businesses with their metal recycling needs. Our services include the collection, processing, and recycling of various types of metal, such as steel, aluminum, copper, and brass. We accept a wide range of metal items, including appliances, machinery, scrap metal, and more. However, there are certain items that we do not accept, such as RVs or campers, steel cable unless it's cut into 3ft sections, cars with gas in the gas tank (unless there is a hole in the gas tank and all gas is drained), materials with radiation, propane tanks, acetylene tanks, tires, and stolen property. Our prices are always up to date on our website, and we strive to provide competitive rates for our customers. Additionally, we offer farm cleanup services for those who need assistance in clearing metal debris from their farms. Contact us today for all your metal recycling needs!
