**A B O U T**

Recycling concrete and asphalt waste has become increasingly popular because of the cost and time savings it allows. And with the push to “go green” today, it just makes sense. Beginning in 1998 with just one crusher, Surmeier & Surmeier, Inc. has expanded its fleet to five portable plants. We now have three impact crushers, one jaw crusher and one cone crusher. Two of our impact crushers are closed circuit plants with 5’x 16’ double deck screens. Along with these machines, we also have three mobile screen plants. Surmeier and Surmeier, Inc. specializes in mobile crushing and screening. With our fleet of portable crushers and screen plants, no job is too big!! Whether you have 10,000 tons of building demo or 200,000 tons of runway, we have the equipment and manpower to get the job done! Surmeier & Surmeier, Inc. operates two Aggregate Recycle Centers in the St. Louis Metro East area; one along I-64 in Caseyville, Illinois and one on Highway 161 just north of Mascoutah, Illinois. These recycle centers accept clean concrete and asphalt for recycle as well as sell aggregate to our local customers. Since we are an approved aggregate supplier for the state of Illinois, several of our products are IDOT approved. Surmeier & Surmeier, Inc. will work with you by processing concrete and asphalt, screening it and crushing it at your site or ours. If you choose our mobile crushing services, your recycled material never has to leave your site, ensuring that you have taken one more step to helping our planet to be a better place to live for future generations. Concrete and asphalt pavements are the nation’s most widely recycled products. Twice as much pavement is recycled than paper, glass, plastic and aluminum combined. We help you turn waste product into valuable material that you can re-use as part of new roads, roadbeds, shoulders and embankments.
