

COMPANY PROFILE

Techused Computer Recycling/Asset Recovery

computerrecyclingcolumbus.com

A B O U T

At Techused Computer Recycling/Asset Recovery, we help minimize unwitting environmental damage by recycling electronics. Laptops, desktop computers, and many other electronic devices such as monitors (both CTR and LCD versions) contain a number of potential toxins; and when you discard your old model for a sleek new upgrade, those toxins can be dumped into a landfill to eventually leach into groundwater. When you bring electronics to us, we will recycle your computer by disassembling it into its components and recycling or properly disposing of the parts. For the most part, our computer recycling in Columbus is free, though certain items require a fee due to difficulty in processing. In addition to our recycling work, we also perform television, LCD monitor, and computer repairs, allowing you to reduce your electronic waste by restoring them to functionality. Ron Bragg, Founder and President of TechUsed LLC, started the company in 2000. He meshed his professional I.T. knowledge with his passion for the environment and set out to make a positive impact on the shared goal of a sustainable earth. At the time, computer and electronic waste was just beginning to attract attention, but Ron saw a terrific opportunity to start a business and give back to mother earth. We are all familiar with the incredibly short lifespan of computers and electronics, due to the constant progression and innovation in the tech world. Ron realized that as consumers and businesses upgrade, they have to do something with their old hardware - hardware that could still have long useful life ahead of it. TechUsed was born then and there, and has been a recognized local industry leader in reverse logistics for over a decade now.
