

COMPANY PROFILE

Tekton Construction & Restoration

tektonteam.com

ABOUT

Restoring Your Home Or Property The Tekton team has the expertise and unique set of skills to fully restore your property. Due to hidden and oftentimes hard to detect damages caused by fire, water and smoke, restoring fire or water damaged properties is not the same as new construction or a simple remodel. Also, from the estimating to the actual reconstruction; the design, building materials and all finishes have to be matched to pre-loss condition. Hence, a specific skill-set and knowledge is required to ensure that the job is done correctly and in the most efficient manner. You can trust that our team has the experience, insight and ability to ensure that your home or property will be completely and properly restored.
