

COMPANY PROFILE

TeleCycle

telecycle.com

A B O U T

TeleCycle is a global provider of fully integrated telecom and IT asset management and recycling solutions. Our diverse clientele includes Fortune 1000 companies, multi-national service providers, government agencies and Original Equipment Manufacturers. Our clients rely on us to manage their electronic assets, minimise disposition-related risks, and maximise residual value from their retired asset. Since our inception in 2007 we have expanded beyond telecom and IT asset recycling to serving the needs of the wider telecommunications and recycling industries. We are now able to deliver services such as on-site de-installation and decommissioning, project management support, consignment, reverse logistics, cell site maintenance work. We are continuously striving to provide solutions to meet our clients needs have the scale and capacity to do so. TeleCycle Group was founded in 2007 to provide professional recycling services and asset management consultancy to the telecom & IT industry. Currently employing over 100 permanent staff throughout the USA, United Kingdom and Hong Kong, TeleCycle continues to grow and deliver world-class services for a diverse portfolio of channel partners including leading OEM vendors, operators, resellers and recyclers. TeleCycle is at the forefront of helping companies worldwide to responsibly manage the lifecycle of their assets by providing truly end-to-end recycling and asset management solutions. TeleCycle is committed to its vision of delivering high-quality professional services and consultancy to the telecom & IT industry. Our many clients rely on us to deliver our services each and every day with integrity, safety and honesty. Constantly striving to exceed expectations, we take great pride in providing solutions that enhance and support our clients' business requirements and objectives. TeleCycle is equally as committed to leading the way in environmental responsibility; with absolutely none of the material we recover going to landfill. TeleCycle is committed in providing the best IT asset disposition and recycling services possible. Our dedication at every step of the process is what sets us apart from our competitors. We are

passionately committed to our clients and to the environment in providing quality and secure asset disposition and recycling services. Commitment to Our Clients Protection of our clients' interests, be it economic or reputation related, is of utmost importance at TeleCycle. We deliver a fully integrated suite of services that aims at providing the maximum return on investment for our clients. From on-site decommissioning and de-installation to recycling and remarketing, TeleCycle offers services at each and every step of the asset disposition process. With our extensive global remarketing channels and our technical expertise we devise innovative solutions to help our clients maximize the value recovered from their assets for an optimal financial return. Notwithstanding the objective-driven nature of our business, we do not overlook the importance of security as a protection of our clients' name, brand, and reputation. Our facilities include a 24-hour remote monitored alarm system, 24-hour camera surveillance, motion detectors, door sensors, and a high security zone separately fenced and screened with keypad access as security measures to protect our clients' confidential and proprietary information. TeleCycle is committed to delivering sustainable business. Through our end-to-end recycling service we are able to deliver a comprehensive solution for the environmentally safe disposal of our clients e-waste. All assets recovered by TeleCycle stay in-house, right up to the point of refinery. This ensures that we are able to provide clear lines of reporting and environmental accountability throughout the entire recycling process. It also means that our clients are able to greatly reduce the carbon footprint associated with disposal of their assets, as the equipment is not passing through the hands of third parties unnecessarily. Our in-house re-processing capabilities encompass, secure storage, data destruction, residual value identification, disassembly, harvesting & direct refinery engagement. Our clients' data security is of the upmost importance. TeleCycle is a member of the National Association for Information Destruction (NAID), the international trade association for companies providing information destruction services. We will carry out and provide evidence of data cleansing using approved BLANCCO software and shred-to-destruction all memory chips and hard drives received. Not only is our facility equipped to handle any project of a sizeable scale; it does so with maximum security. It is fitted with a 24-hour remote monitored alarm system, 24-hour camera surveillance, motion detectors, door sensors, and a high security zone separately fenced and screened with keypad access to cater to clients with additional security

requirements. Managing impact the disposal of e-waste has on the environment is of primary concern to both TeleCycle and its customers. Keeping any impact that our services might have to environment the very minimum is at the very heart of everything TeleCycle does. TeleCycle holds a number of internationally recognised environmental certification as well as being signed up to the most stringent environmental compliance schemes in every country of operation. In order to assist out clients with meeting their corporate responsibility programs, we provide a comprehensive audit trail for all parts received with full reporting and certificates of destruction on all recycled material. TeleCycle achieves and maintains a zero landfill policy, ensuring that all e-waste material is reused or recycled via the correct channels. By owning all stages of recovery and reprocessing, we are able to ensure that this policy is strictly adhered to with photo evidence and Certificates of Destruction available for all material received into our facilities.
