## ABOUT

With over four decades of experience, Texas Industrial Scrap Iron & Metal is one of the largest privately owned metal recycling companies in the state of Texas. Starting as a family business in Fort Worth, Texas, Texas Industrial Scrap Iron & Metal has since grown to an international business shipping recycled metals all around the world. Today, Texas Industrial recycles millions of pounds of scrap metals each year, preserving our precious natural resources. The metals are purchased from three different sources: individuals looking to make extra income through recycling, industrial manufacturing companies that generate scrap metal through fabrication and other recycling companies who turn to Texas Industrial for logistics and expertise in recycling. Texas Industrial Scrap Iron and Metal purchases all types of ferrous and non-ferrous metals, including, but not limited to: Iron, Copper, Brass, Aluminum, Insulated Wire, Nickel, Stainless Steel, Batteries, Lead, Die Cast, and Electric Motors. We follow all government guidelines and meet our customer's demands. After the materials have been collected at Texas Industrial, the metals are sorted and processed through different methods; then they are shipped off to mills and smelters around the world. Texas Industrial owns a large fleet of trucks, equipment, and modern machinery to provide the finest customer service, as well as to efficiently manage daily operations. Texas Industrial Scrap Iron and Metal offers a wide range of commercial and industrial roll off container services. We currently offer 15, 20, 30 and 40 yard roll-off containers that can be placed at your business location or jobsite. These containers can handle any load to be filled with ferrous or non-ferrous metals. If you have any question please contact us!
