## ABOUT

The Wall is a retaining wall and concrete contractor based in Portland, Oregon. We specialize in building with recycled concrete, creating environmentally beautiful walls and custom landscape designs. Our services include masonry and concrete construction, specializing in retaining walls, patios, driveways, stairs, and other hardscape features. We clean and recycle concrete chunks from municipalities' sidewalk replacements to create an old stone look in our projects, saving valuable landfill space. With over 600 tons of concrete recycled every year, we have been the premier retaining wall builder in Portland since 1985.
