

COMPANY PROFILE

Toledo Auto Parts

toledoautopart.com**ABOUT**

We also strive to keep our business environmental friendly for our community. we can provide used auto parts for almost any model. We sell only the highest quality guaranteed used car parts for all makes and models. Unlike remanufactured or aftermarket parts, recycled parts are guaranteed to fit and can cost up to 50% less than new parts . Our family looks forward to providing you the same quality customer care that our current customers enjoy. We are here to assist you with all your auto used parts needs. If you or one of your customers needs a certain part, Toledo Auto Parts will likely have that part in our salvage yard. Most other auto salvage yards don't go through the large amount of salvage cars that we do on a daily basis. As junk car buyers in Ohio, we are able to add onto our enormous surplus of used parts by welcoming dozens of new vehicles into our salvage yard regularly. Most of these vehicles are salvaged due to an accident, and their auto salvage parts are undamaged, original equipment manufacturer (OEM) parts. OEM parts fit in any individual vehicle of the same make and model that the part was made for, meaning that there is little risk for malfunction during or after installation. Our salvage yards are not limited to cars. We also have a collection of vans, SUVs, motorcycles, and many other types of vehicles.
