## ABOUT

VM Environmental Consulting is a veteran and women owned business that is driven to bridge the gap in protecting our small industrial businesses and our natural resources. They understand the challenges of owning a small business and aim to help other small businesses that cannot afford full-time environmental compliance staff still meet all their regulatory requirements at an affordable price. VM Environmental Consulting offers services such as permitting and registrations, compliance, reporting, and emergency spill response. They serve industries such as construction, petroleum transporters, salvage, and concrete. Their goal is to navigate the permitting and compliance process so that businesses can focus on their growth and success.
