

Woodez Care Guide

Congratulations on the purchase of your new WOODEZ oak floor and we would love to help you keep your floors in pristine condition. Your floors will handle heavy traffic, harsh grit, moisture and UV factors on a daily basis that will determine the look and wear of the coatings. We understand that our floors will change in appearance over time with wear and tear but a good maintenance program will extend the life of your floors. Our simple 3 step process will help protect the factory coatings and allow the floors to handle the daily conditions that they endure.

Clean- Keeping floors clean and free of grit, sand and dirt is key to reducing scratching. Surface grit will act as an abrasive and break down the surface coating which will allow moisture to stain the floors. The use of rugs and mats at entry points will help to remove grit that are under footwear and regular vacuuming is highly recommended.

Washing- Washing floors regularly with our recommended WOCA product range helps remove dirt and grime as well as helps build up the oil contained in the surface finish.

Protection- The use of window furnishing to reduce direct sunlight and felt furniture protectors will help reduce scratches when moving furniture around the floors.

Cleaning Program:

WOCA Natural Soap- Oil Finish

Clean and maintain oiled, waxed and soaped wood surfaces with WOCA Natural Soap. This mild, penetrating soap removes dirt and helps prevent the wood from drying out and cracking. It leaves behind a microscopic, breathable soap layer on the surface that maximises resistance and makes the surface easier to keep clean. Natural Soap is indoor climate labelled and free of perfume and additives.

- Before using WOCA Natural Soap, sweep or vacuum your floors.
- Shake the bottle well before use, making sure the pigments are mixed well.
- Mix 125 ml of Natural Soap with 5 litres of lukewarm water.
- Using a well-wrung mop, damp mop the floor with the Natural Soap mixture.
- Leave the floor to dry.

For best results, use two buckets: one with soap water and the second with clean water to rinse the first mop

WOCA Master Soap- Lacquer Finish

WOCA Master Cleaner is used to clean lacquered floors removing dirt and grime, while strengthening the surface and making it more resistant to spills. It leaves no soapy residue making it perfect for areas where frequent washing of floors is necessary.

- Mix 125ml of Master Cleaner with 5 litres of hot water.
- Wipe the floor lengthwise.
- It is important that no water is left on the floor after cleaning.

For best results, use two buckets: one with soap water and the second with clean water to rinse the first mop.
