Eureka Math™ Tips for Parents

Grade 2 Module 1

Sums and Differences to 20

In this first module of Grade 2, we set the foundation for students to master sums and differences to 20. They will then apply these skills to fluently add one-digit to two-digit numbers up through 100, using place value understanding, properties of operations, and the relationship between addition and subtraction.

A new way to count!

Regular	Say Ten
fifty-one	5 tens 1
sixty-seven	6 tens 7
seventy-five	7 tens 5
eighty-four	8 tens 4
ninety-five	9 tens 5

Above, an illustration of the “Say Ten” way of counting, in which students name how many tens are in a number and then say the ones.

Terms, Phrases, and Strategies in this Module:

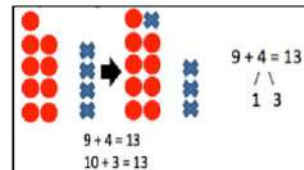

STRATEGY: Make ten and subtract from ten - strategy in which students decompose a number in order to make a ten, thus using simpler, known facts to solve the problem, e.g., $8 + 3 = 8 + 2 + 1$ and $15 - 7 = 10 - 7 + 5 = 3 + 5$

STRATEGY: Say ten counting - e.g., 11 is “1 ten 1,” 12 is “1 ten 2,” twenty is “2 tens,” 27 is “2 tens 7,” 35 is “3 tens 5,” 100 is “10 tens,” 146 is “14 tens 6.”

Ten plus: number sentences in which students automatically combine one addend with the group of 10 without having to count, e.g., $10 + 3 = 13$, $30 + 5 = 35$, $70 + 8 = 78$

Number bond: used to explore the part/whole relationships within a given number, e.g., for the number 6:

$5 + 1 = 6$,
 $1 + 5 = 6$,
 $6 - 1 = 5$,
 $6 - 5 = 1$

The “make a ten” strategy: note how 4 is decomposed as 1 and 3 in order to make a ten, i.e., $9 + 1 + 3 = 10 + 3$.

What Comes After this

Module: In Module 2, students will engage in activities designed to deepen their conceptual understanding of measurement and to relate addition and subtraction to length. They will use metric units in this module; customary units will be introduced in Module 7.

+ How you can help at home:

- Review with your student all the ways to make 10; students will need to have these memorized as we work through this module
- Practice “10 plus” problems, such as $10 + 9$, $20 + 8$, $40 + 6$, $70 + 7$, and so on, so that your student becomes very adept at doing them mentally and quickly

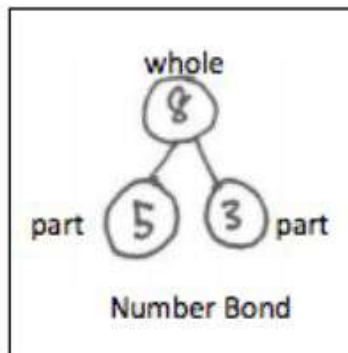

Key Common Core Standards:

- Represent and solve problems involving addition and subtraction**
 - Use addition and subtraction within 100 to solve one- and two-step word problems
- Add and subtract within 20**
 - Fluently add and subtract within 20 using mental strategies
- Use place value understanding and properties of operations to add and subtract**
 - Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction

Welcome to A Story of Units!

Each module's parent tip sheet will highlight a new strategy or math model your student will be working on.

Number Bonds are a tool first introduced in earlier years of *A Story of Units*. They illustrate a part-part-whole relationship and are very useful in this module as students use the “make a 10” strategy for both addition and subtraction.

$$\begin{array}{c} 87 \\ \swarrow \searrow \\ 80 \quad 7 \end{array} + \begin{array}{c} 5 \\ \swarrow \searrow \\ 3 \quad 2 \end{array} = 92$$

In the above problem, the number bonds illustrate how to decompose the numbers in order to make $80 + 7 + 3 + 2$, or $80 + 10 + 2$, or 92.

Read on to learn a little bit about *Eureka Math*, the creators of *A Story of Units*:

Eureka Math is a complete, PreK-12 curriculum and professional development platform. It follows the focus and coherence of the Common Core State Standards (CCSS) and carefully sequences the progression of mathematical ideas into expertly crafted instructional modules.

This curriculum is distinguished not only by its adherence to the CCSS; it is also based on a theory of teaching math that is proven to work. That theory posits that mathematical knowledge is conveyed most effectively when it is taught in a sequence that follows the “story” of mathematics itself. This is why we call the elementary portion of *Eureka Math* “*A Story of Units*.” The sequencing has been joined with methods of instruction that have been proven to work, in this nation and abroad. These methods drive student understanding beyond process, to deep mastery of mathematical concepts.

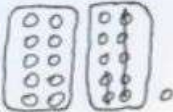

The goal of *Eureka Math* is to produce students who are not merely literate, but fluent, in mathematics. Your student has an exciting year of discovering the story of mathematics ahead!

Sample Problem from Module 1: (Example taken from Module 1, Lesson 8)

Kayla has 21 stickers.

She gives Sergio 7 stickers.

How many stickers does she have left?

$$\begin{array}{r} 21 - 7 = 14 \\ \wedge \\ 11 \quad 10 \\ 10 - 7 = 3 \\ 11 + 3 = 14 \\ 21 - 7 = 14 \end{array}$$

Heggerty - Phonics

In Bridge to Reading, children will engage in blending, segmenting, and substituting sounds in words. These lessons are an oral and auditory warm-up to phonics instruction. We can hear about 44 phonemes in the English language. There are 26 letters of the alphabet and more than 200 ways to use those letters to represent the 44 sounds we hear in words. Phonemic awareness and phonics enjoy a reciprocal relationship. When phonemic awareness instruction is provided as a warm-up, children's cognitive load is reduced, and they are able to build proficiency and automaticity in the skills of isolating, blending, segmenting, and manipulating.

在“阅读桥梁”课程中，孩子们将学习拼读、分割和替换单词中的声音。这些课程是语音教学的口语和听觉热身。我们能听到英语中大约44个音素。字母表有26个字母，而这些字母有超过200种方法来表示我们在单词中听到的44个声音。音素意识和语音教学是相辅相成的。当音素意识教学作为热身课程时，孩子们的认知负荷会降低，他们能够熟练地掌握分离、拼读、分割和操作的技能，并使其自动化。

En Puente a la Lectura, los niños participarán en la combinación, segmentación y sustitución de sonidos en las palabras. Estas lecciones son un precalentamiento oral y auditivo para la instrucción fonética. En inglés, podemos escuchar alrededor de 44 fonemas. Hay 26 letras del alfabeto y más de 200 maneras de usarlas para representar los 44 sonidos que escuchamos en las palabras. La conciencia fonémica y la fonética mantienen una relación recíproca. Cuando la instrucción de conciencia fonémica se proporciona como precalentamiento, se reduce la carga cognitiva de los niños y pueden desarrollar competencia y automaticidad en las habilidades de aislar, combinar, segmentar y manipular.

Reading and Math Screeners

Your child will be taking an Acadience reading and math screener at the beginning (BOY), middle (MOY), and end (EOY) of the school year.

Su hijo tomará una prueba de evaluación de lectura y matemáticas de Acadience al comienzo (BOY), a la mitad (MOY) y al final (EOY) del año escolar.

您的孩子将在学年开始(BOY)、学年中期(MOY)和学年末(Eoy)参加 Acadience 阅读和数学筛查。

Reading Screener

Goals of Acadience Reading K-6

Acadience Reading helps teachers identify children at risk for reading difficulties and determine the skills to target for instructional support. Acadience Reading K-6:

Building Happy Places

► What do you do when you go to a playground? Maybe you run as quickly as you can to an empty swing, hop in, and soar to the sky. All children like to play and do fun things. There are lots of different ways to have fun. Matthew is a teenager who uses a wheelchair. He wanted some cool things for the playground that all children could use, so he did something about it.

When he was only six years old, Matthew had a great idea. He thought of a swing that all kids could use. It looks like a big boat. It can hold two kids in wheelchairs and six other children at the same time. He called it The Dreamer. The challenge for Matthew was to look at all the things on a playground and figure out how they could be made to work with a wheelchair. That way all children could play together.

Matthew gives his time to a group that builds playgrounds that are fun for all kids. The playgrounds have the usual swings that you would find in most places. They also have swings like The Dreamer. Instead of sandboxes on the ground, they have sand tables that children in wheelchairs can use. Matthew helps the group raise money so they can build more playgrounds. They built a special one called Friendship Place. It was built at Matthew's school.

For his work helping other children Matthew has been given many awards. He even had his picture on a cereal box. He feels proud that what he does helps all children play together and makes everyone happy.

HOMEWORK POLICY

We are being very mindful of how important of your child's time at home. We are assigning a small amount of homework at the start of the school year, and it will slowly become a little bit longer.

- 1) Fluency homework should be timed, they are reading the story as best they can in 1 minute.
- 2) The math homework should only take between 10-15 minutes.
- 3) The red word (sight word) practice should take about 5 minutes or less.

We are focusing on quality of work over quantity.

我们非常重视您孩子在家的时间。我们在学年开始时布置少量作业，之后会逐渐增加作业量。
流利度作业应该计时，要求孩子在1分钟内尽可能完整地阅读故事。
数学作业只需10-15分钟。

红色单词(常用词)练习大约需要5分钟或更短的时间。

我们注重作业质量而非数量

Somos muy conscientes de la importancia del tiempo que su hijo/a pasa en casa. Al inicio del curso escolar, les asignaremos una pequeña cantidad de tareas, que poco a poco se irán haciendo más largas.

Las tareas de fluidez deben cronometrarse; los niños leen el cuento lo mejor que pueden en 1 minuto.

La tarea de matemáticas solo debe tomar entre 10 y 15 minutos.

La práctica de palabras rojas (palabras reconocibles a simple vista) debe tomar unos 5 minutos o menos.

Nos centramos en la calidad del trabajo, no en la cantidad.

Handout 1A: Fluency Homework

Dear Families,

Welcome to our classroom! This year your child will receive regular reading fluency practice for homework. Fluency homework helps build your child's confidence with reading.

Each week of fluency homework, your child has a passage of text upon which to focus.

On the first homework assignment with a new passage, we want students to say every word clearly and know what the passage means. If they accomplish just that much, please check off the expectation.

On the second assignment, we want students to chunk the words as they read. We all do this when we speak! The easiest way to do this is to read to a comma or a period. For poems, this means reading the lines as if they had a comma or period. We encourage you to read aloud with your child and play with the phrasing.

The third day might be the most fun. Encourage your child to be dramatic and theatrical! Choose the words that carry the deepest meaning for emphasis. Say those words more boldly, while continuing the phrasing.

Handout 1A: Fluency Homework Option A

Dot a dot dot dot a dot dot
Spotting the windowpane.

Spack a spack speck flick a flack fleck
Freckling the windowpane.

A spatter a scatter a wet cat a clatter
A splatter a rumble outside.

36 words

Merriam, Eve. "Weather." *Catch a Little Rhyme*, Macmillan, 1966.

Have an adult initial each day that you read the passage three to five times. Optional: Have a peer sign on the second row of boxes, checking your progress.

Day 1	Day 2	Day 3

Decodable Passage

2nd Grade | Unit 1 | Week 1

Phonemic Awareness

Each day, your child plays word games such as blending and segmenting sounds in spoken words. You can play these word games at home!

Say the sounds and ask your child to blend them together to say a word.

- p - ā - k → pack
- m - ē - s → mess
- t - ī - p → tip
- b - ū - s → bus

**Remember - Say sound, not letter name*

Say the word below. Ask your child to repeat the word and segment it into 3 sounds.

- sock → s - ō - k
- did → d - ī - d
- gap → g - ā - p
- yes → y - ē - s

Phonics

This week your child will read words with short vowel sounds, in the words: slām, būs, and stōp. Your child also practiced adding endings to read the words: foxes, asking, and wanted. We are learning that adding endings to words can change the meaning of the base word.

On the back of this letter you will find the decodable passage that your child will read at school, **Rob and Pim Move In**. In this story, your child will read many words with short vowels. Your child can read the passage multiple times for extra practice.

Red Words

Red words are words that appear frequently in print, and your child is learning to read and spell these words. At school, your child has word cards for these four words to practice reading and writing the words in sentences. In second grade, it is important to always connect these words to meaning. Encourage your child to use these words in a sentence!

This week's Red Words are: want, live (noun and verb), put, help

Bridge to Learning at Home

Spelling Practice: Say the words to your child and have them write them on a piece of paper to practice the spelling patterns they have learned.

1. box
2. trip
3. hops
4. spots
5. foxes
6. log
7. fixing

Tips for Reading the Decodable Passage:

Prior to reading, ask your child to highlight or underline this week's Red Words and read them aloud.

Extension: Ask your child to circle words with endings -s, -ed, -es, -ing in the passage and read them aloud.

Your child should have the phonics knowledge to read the majority of the words in this passage on their own. Your child may not read it fluently yet.

Decodable Passage

Rob and Pim Move In

Rob and Pim are foxes. One day, the two foxes saw a big log. Rob said, "I want to live in that log. Can you help me fix it up?"

"I can help you fix up that log," said Pim. "Can I live in it with you?"

"If you want to," said Rob. The two foxes started fixing up the log to live in. They put their beds in the log. They put up curtains. They made the log look nice.

Then Pim had to get one more thing, his box of hats. It was a big box that had a lot of hats in it. But the box would not fit in the log. So Pim had to put his box of hats on top of the log.

Math Homework

A STORY OF UNITS Lesson 1 Homework Helper 2•1

Fluency Practice

Making ten and adding to ten is foundational to future Grade 2 strategies. Students use a number bond to show the part-whole relationship with numbers.

This is the whole.

10

2 8

This is one part.

This is the other part.

8 + 2 = 10

I know part + part = whole

2 + 8 = 10

10 - 8 = 2

10 - 2 = 8

I also know whole - part = part

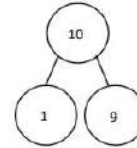

10 = 7 + 3

I need to be careful when looking at the signs. This says 10 equals 7 + __, not 10 plus 7 = __. That means 10 is the same as 7 + 3.

Name _____ Date _____

1. Add or subtract. Complete the number bond for each set.

9 + 1 = ____

1 + 9 = ____

10 - 1 = ____

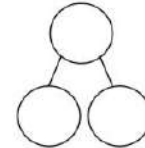

10 - 9 = ____

8 + 2 = ____

2 + 8 = ____

10 - 2 = ____

10 - 8 = ____

2. Solve. Draw a number bond for each set.

6 + 4 = ____

4 + 6 = ____

10 - 4 = ____

10 - 6 = ____

3 + 7 = ____

7 + 3 = ____

10 - 7 = ____

10 - 3 = ____

3. Solve.

10 = 7 + ____

10 = 3 + ____

10 = 5 + ____

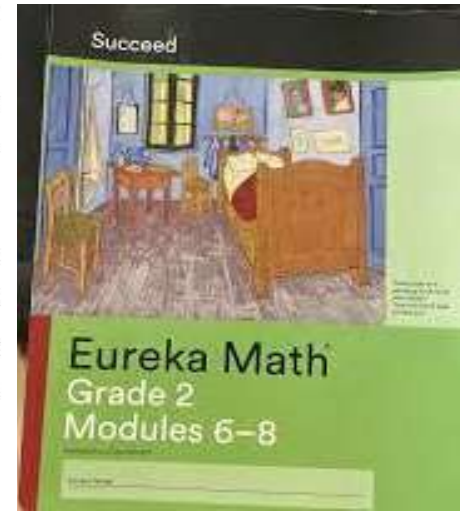

10 = 2 + ____

10 = ____ + 8

10 = ____ + 4

10 = ____ + 6

10 = ____ + 1

Drills

Ensuring the safety of all students at P.S. 131 is our top priority. To help maintain a safe and secure environment, we conduct regular safety drills throughout the school year. These drills are designed to familiarize students and staff with the proper procedures in case of emergencies and to practice how to respond quickly and effectively.

Types of drills we practice:

Fire drills - to ensure students know how to safely and calmly evacuate the building in case of a fire.

Lockdown drills - to prepare students and staff for situations where there may be a potential threat inside the building.

During these drills, teachers will guide students through the steps necessary to stay safe. These drills are conducted in a calm and reassuring manner.

If a drill is scheduled, it will be on the monthly parent calendar. This leaves room for you to have any necessary discussions with your children prior to the drill.

Garantizar la seguridad de todos los estudiantes en la escuela P.S. 131 es nuestra principal prioridad. Para ayudar a mantener un entorno seguro, realizamos simulacros de seguridad regularmente durante el año escolar. Estos simulacros están diseñados para familiarizar a los estudiantes y al personal con los procedimientos adecuados en caso de emergencia y para practicar cómo responder con rapidez y eficacia.

Tipos de simulacros que practicamos:

Simulacros de incendio: para asegurar que los estudiantes sepan cómo evacuar el edificio de forma segura y tranquila en caso de incendio.

Simulacros de confinamiento: para preparar a los estudiantes y al personal ante situaciones donde pueda existir una amenaza potencial dentro del edificio.

Durante estos simulacros, los maestros guiarán a los estudiantes a través de los pasos necesarios para mantenerse seguros. Estos simulacros se llevan a cabo de manera tranquila y tranquilizadora.

Si se programa un simulacro, se incluirá en el calendario mensual para padres. Esto les permite tener las conversaciones necesarias con sus hijos antes del simulacro.

确保131公立学校所有学生的安全是我们的首要任务。为了维护安全可靠的环境，我们在整个学年定期举办安全演习。这些演习旨在让学生和教职员工熟悉紧急情况下的正确程序，并练习如何快速有效地应对。

我们进行的演习类型：

消防演习——确保学生了解如何在发生火灾时安全冷静地疏散建筑物。

封锁演习——帮助学生和教职员工做好应对建筑物内可能存在潜在威胁的准备。

在这些演习中，老师将指导学生完成必要的安全步骤。这些演习以平静和令人安心的方式进行。

如果安排了演习，它将被列入每月的家长日历。这为您在演习前与孩子进行任何必要的讨论留出了时间。

Hello Families!

I have been teaching and performing music professionally for over 20 years. I received bachelor's and master's degrees in music composition and jazz studies from the Indiana University Jacobs School of Music before moving to New York City, where I taught world percussion at hundreds of NYC Public Schools. I am currently finishing a second master's degree in childhood education from Touro University. When I'm not teaching, I am taking care of my two children.

Obtuve una licenciatura y una maestría en composición musical y estudios de jazz en la Escuela de Música Jacobs de la Universidad de Indiana, antes de mudarme a la ciudad de Nueva York, donde enseñé percusión de diversas culturas en cientos de escuelas públicas de NYC. Actualmente estoy terminando una segunda maestría en educación primaria en la Universidad Touro. Cuando no estoy enseñando, me dedico a cuidar a mis dos hijos.

Introducción:

¡Hola a todos! Soy la Sra. Kwong y estoy muy emocionada de darles la bienvenida a su hijo/a al Laboratorio de Ciencias este año académico. He sido maestra de aula durante tres años y este es mi primer año en la escuela pública 131.

Mi mayor deseo es fomentar el amor por la ciencia mediante experimentos prácticos y actividades colaborativas que se ajusten a los Estándares de Aprendizaje de Ciencias del Estado de Nueva York para estudiantes de primaria y secundaria.

Expectativas:

En esta clase, se espera que todos los estudiantes compartan su opinión, se respeten mutuamente, hagan preguntas y sintetizen la información para profundizar su comprensión.

También se espera que su hijo/a participe en los debates en clase y realice actividades de escritura con sus cuadernos de investigación. Esta práctica le ayudará a familiarizarse con la terminología científica y a desarrollar nuevos conocimientos a medida que investigamos cada unidad de estudio.

引言：

大家好！我是 Ms. Kwong，非常高興地歡迎您的孩子在本學年加入科學實驗室。我擔任課堂教師已有三年，今年是我在 131 公立學校的第一年。

我真誠地希望透過符合紐約州 12 年級科學學習標準的動手實驗和合作活動，培養學生對科學的熱愛。

期望：

在這個課堂上，所有學生都應分享自己的聲音，相互尊重，提出問題並整合資訊以加深理解。

您的孩子也應參與課堂討論，並使用他們的調查筆記本進行寫作活動。這個練習將幫助您的孩子熟悉科學術語，並在我們調查每個學習單元的過程中獲得新的理解。
