Medical Courier Information

for Healthcare Teams

Las Vegas | Henderson | Boulder City
Local and selected Southern Nevada routes

Haulnado provides **reviewed healthcare-related courier delivery** for clinics, pharmacies, laboratories, administrative teams, care organizations and medical offices. The actual item, packaging, release instructions, route, timing and receiving requirements determine whether a request can be accepted.

SERVICES

What We Can Review

- ✓ **Records & Administrative Documents**
Approved records, signed forms, packets and office-to-office materials.
- ✓ **Non-Biohazard Supplies**
Approved office, medical-support and healthcare-related supplies suited to ordinary vehicle transport.
- ✓ **Ready, Sealed Prescriptions**
Pickup only after the pharmacy confirms release to the named courier and the recipient is ready.
- ✓ **Lab Specimens**
The specimen and required packaging, labeling, temperature, timing and custody process must be reviewed first.
- ✓ **Keys, Badges & Access Materials**
Approved operational handoffs between facilities, departments and administrative teams.
- ✓ **Recurring Office Routes**
Repeat routes can be reviewed around actual stops, items, frequency and receiving windows.

Scope review protects both teams

Restricted medications, hazardous materials, specialized temperature control, oversized equipment and unusual handling may require another provider or may fall outside standard scope. Ordinary courier service is not represented as validated cold-chain transportation.

PROCESS

How to Request a Run

- 1 Share the route and item category**
Provide pickup, destination, general item type, package count and requested timing. Do not send unnecessary patient information.
- 2 Confirm release and receiving details**
Identify the authorized pickup contact, recipient or staff role, access instructions and required handoff.
- 3 Review scope, availability and price**
Haulnado reviews the request and provides a quote when the delivery fits the available service.
- 4 Book before dispatch**
Confirm the accepted shipment and route, complete booking and secure a payment method before dispatch.
- 5 Agree on delivery confirmation**
Before pickup, specify whether the run needs a receipt, signature, recipient name or role, time record, or another approved acknowledgment.

PRICING & AVAILABILITY

Quoted for the actual route

Price depends on distance, stop count, timing, access, waiting, packaging and approved handling needs. The quote is provided before the run is confirmed. Same-day, after-hours or weekend service may be reviewed when capacity allows; no timing or around-the-clock availability is guaranteed.

OPERATIONS

A Clear Healthcare Handoff

- ✓ **Privacy-Conscious Communication**
Use only the practical information needed to complete pickup and delivery.
- ✓ **Prepared, Closed Packages**
The releasing organization prepares and labels the package; the courier does not open or repackage it.
- ✓ **Authorized Direct Handoff**
Delivery is made to the person or staff role confirmed in the accepted plan.
- ✓ **No Clinical Decisions**
Medication advice, dispensing, counseling and clinical questions remain with licensed professionals.
- ✓ **Request-Specific Documentation**
Any signature, receipt, custody note or exception process is agreed before pickup.

COMMON REQUESTING TEAMS

- Clinics and healthcare offices
