

TARIMATEC DECKING · CANADA

# Sustainability & Certificates

A summary of the environmental declarations, certifications and test reports held for Tarimatec Ecofiber Stone Composite decking.

| Document                | What it covers                                                                                                                                                                                       | Reference / status                                          |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------|
| EPD S-P-07588           | Environmental Product Declaration for the decking board – verified, third-party declaration of the product’s life-cycle environmental performance. The full EPD is published alongside this summary. | Verified · valid to 2027-12-02                              |
| ISO 14001               | Environmental management system certification for the manufacturing site (Plásticos Viters, Valencia).                                                                                               | Held by the manufacturer                                    |
| VOC / indoor emissions  | Volatile organic compound emissions – Oeko-Tex VOC pass.                                                                                                                                             | AITEX report 2023AN6040                                     |
| Solar Reflectance Index | Solar reflectance of the board surface, measured on a white sample; darker finishes return lower values.                                                                                             | Tecnalia report 082062-002 · SRI up to over 80 · ASTM E1980 |

## COMPOSITION AND CIRCULARITY

PVC 100 : rice husk 50 : limestone 40 — parts by weight.  
33 % recovered composite re-used in production, per the EPD. The product is recyclable at end of life.

## Notes on reading these figures

- Tarimatec is a PVC-mineral composite — an Ecofiber Stone Composite of PVC, rice husk and limestone.
- The solar reflectance figure is a white-sample measurement. Specify the finish colour where reflectance is being relied on.
- Water absorption is 0.59 % at 24 h (EN 317) for the hollow deck.

Certificates held by the manufacturer, Plásticos Viters S.L (Tarimatec), Valencia, Spain. Copies on request.
