

Plus Premium Male Check-Up Package

Total Cost: 2500 USD

Check-up Examination

Neurology Examination

Nutrition and Dietitian Examination

Cardiology Examination

Eye Diseases Examination

Urology Examination

Ear Nose and Throat Examination

Chest Diseases Examination

Physical Therapy and Rehabilitation Examination

Radiological Examinations:

Thyroid Ultrasound: Visualization of the thyroid (goiter) gland

Carotid Doppler Ultrasound: Diagnosis of vascular problems

Chest X-ray Bidirectional Chest X-ray

Brain MRI Evaluation of intracranial anatomical structures

Uroflometry: Detection of urinary tract diseases

Audiometry Detection of hearing-ear diseases

Whole Abdominal Ultrasound: Ultrasound imaging of all abdominal organs

Cardiological Examinations:

Electrocardiography: Diagnosis of heart diseases and rhythm disorders

Echocardiography: Examination of the heart muscle and its neural transmission system

Treadmill Test: Diagnosis of heart diseases

Treadmill Test: Diagnosis of heart diseases

Clinical Reviews:

Pulmonary Function Test

Laboratory Examinations:

Fasting Insulin : Insulin Hormone Level Measurement

Fasting Blood Glucose: Diagnosis of diabetes

ALP: Diagnosis and monitoring of liver and bone diseases

ALT: Liver function test

Anti-HIV: Diagnosis and monitoring of AIDS

Anti-HBS Detection of immune status against hepatitis B

Anti-HCV: Detection of immune status against hepatitis C

ASO: Streptococcal infection diagnosis and follow-up

AST: Liver function test

BUN/UREA: Renal function test

CA 19-9: Diagnosis and Treatment Monitoring of All

Gastrointestinal System Cancers

CRP: Diagnosis of infectious diseases

Iron Binding Capacity: Diagnosis of diseases of blood and iron metabolism

Iron Diagnosis of diseases of blood and iron metabolism

Ferritin Diagnosis of diseases of blood and iron metabolism

FT4: Diagnosis of thyroid/goiter diseases

Fecal Occult Blood: Diagnosis and follow-up of bleeding

diseases originating from the stomach and intestines

GGT: Liver function test

HBA1c Diagnosis and monitoring of diabetes

HBSAg: Detection of hepatitis-B disease and carriage

HDL Cholesterol Benign cholesterol

Hemogram: Examination of anemia, blood diseases and blood cells

Homocysteine Detection of disease susceptibility to stroke, stroke and atherosclerosis

Calcium Diagnosis and monitoring of bone and calcium metabolism

Chlorine :Evaluation of electrolyte balance and acid-base and water metabolism

Creatinine Renal function test

Creatine Kinase (CK)

LDH Detection of lung, lymphoma, anemia and liver diseases

LDL Cholesterol Malignant cholesterol

Lipoprotein A: Detection of Disease Trends in Stroke, Stroke and

Vascular Occlusion

Potassium: Evaluation of electrolyte and acid-base balance and monitoring of renal function

Prolactin Prolactin hormone measurement

RF (Rheumatoid Factor): Diagnosis and monitoring of rheumatoid arthritis

Sedimentation Diagnosis and treatment of infectious and inflammatory diseases

Free PSA: Diagnosis of prostate cancer

Sodium: Evaluation of electrolyte and water balance

Complete Urine Analysis: Diagnosis of diseases of the kidneys, urinary tract and bladder

Testosterone Testosterone hormone measurement

Total Cholesterol Measurement of body fat content

Total PSA: Diagnosis of prostate cancer

Triglycerides: Cholesterol measurement

TSH Diagnosis and monitoring of thyroid diseases and functions

Uric Acid: Protein metabolism and diagnosis of gout

Vitamin B12: Diagnosis of anemia and some nervous system disorders

Vitamin D3: Diagnosis and monitoring of vitamin D diseases

Albumin
