Principal/Associate Structural Engineer

JOB REFERENCE	FUS-0064
LOCATION	London
SALARY	£50,000-£65,000
EMPLOYMENT	
HOURS	
WORKING ARRANGEMENT	

THE CLIENT

An established structural engineering consultancy in Central London is appointing a Principal or Associate Structural Engineer. The practice provides structural design for new-build, refurbishment, temporary works and specialist structures projects.

The team works across steel, reinforced concrete, timber and masonry structures and coordinates closely with clients, architects, contractors and specialist consultants.

THE ROLE

You will manage multiple structural engineering projects, allocate work and provide senior technical direction to engineers and technicians. The position combines design leadership with client representation, project coordination and the production or review of formal technical documentation.

The appointment may be made at principal or associate level according to the successful engineer's experience, chartered progress and ability to lead projects and people.

KEY RESPONSIBILITIES

- Lead structural analysis and design across steel, concrete, timber and masonry projects.
- Manage multiple projects and coordinate priorities, resources and issue dates.

- Allocate work to engineers and technicians and review technical outputs.
- Represent the consultancy at client, design-team and contractor meetings.
- Liaise with clients, consultants and contractors throughout project delivery.
- Prepare and review accurate reports, calculations, drawings and project documentation.

PROJECT DELIVERY

- Oversee project delivery from appraisal and survey stages through detailed design and construction support.
- Identify technical and programme risks and agree practical responses with the project team.
- Maintain appropriate checking, quality assurance and document-control procedures.
- Coordinate multidisciplinary information and support the effective use of project resources.

REQUIRED EXPERIENCE

- A BEng or MEng in civil or structural engineering, or an equivalent recognised qualification.
- At least seven years of postgraduate structural engineering experience, as confirmed in the client brief.
- Chartered status or active progress toward chartership through IStructE or ICE.
- Design and structural analysis experience across steel, concrete, timber and masonry.
- Experience managing projects and coordinating engineers and technicians.
- Ability to represent the consultancy and produce accurate technical reports and project documentation.

DESIRABLE EXPERIENCE

- Associate-level experience in client management, resource allocation or team development.
- Experience with refurbishment, temporary works or specialist structural elements.
- Proficiency in relevant structural engineering design software.
- A full driving licence and access to your own transport, as requested in the client brief.
