Senior Structural Engineer

JOB REFERENCE FUS-0135

LOCATION London

EMPLOYMENT Permanent

HOURS Full-time

THE CLIENT

This opportunity is with a civil and structural engineering consultancy delivering projects of varying scale. The London structural team is seeking a Senior Structural Engineer who can combine design responsibility with BIM-based modelling and collaborative project work.

THE ROLE

You will take a senior role in the design and modelling of structures, contributing technical input across a varied project workload.

The position suits an engineer who can work with a good level of independence, communicate clearly and contribute positively to the continued development of the practice.

KEY RESPONSIBILITIES

- Develop structural engineering design solutions across a varied project workload.
- Engineer and model structures within a BIM-based project environment.

- Coordinate structural design information with project colleagues.
- Communicate technical information clearly with colleagues and project stakeholders.
- Contribute to the development of project approaches and the wider structural engineering practice.

PROJECT DELIVERY

- Work across projects ranging from smaller commissions to major developments.
- Contribute to coordinated design and BIM model development through project delivery.
- Maintain clear communication with project teams as work progresses.

REQUIRED EXPERIENCE

- An MEng degree or equivalent relevant engineering qualification.
- Experience delivering structural engineering design at a level appropriate to a senior appointment.
- Ability to engineer and model structures in a BIM-based environment.
- Ability to communicate technical information clearly.
- Evidence of effective collaborative working within project teams.

APPLICATION
