Civils & Drainage Engineer

JOB REFERENCE	FUS-0136
LOCATION	Greater London
EMPLOYMENT	Permanent
HOURS	Full-time

THE CLIENT

This opportunity is with a civil and structural engineering consultancy delivering projects of varying scale. The Greater London team is looking to add an engineer focused on civil engineering and drainage design.

THE ROLE

You will contribute to civil engineering and drainage design, developing and modelling project information in a BIM environment.

The role combines technical design with collaborative delivery across a varied project workload and would suit an engineer who communicates clearly and wants to continue developing their capability.

KEY RESPONSIBILITIES

- Develop civil engineering and drainage design solutions.
- Produce and coordinate civil engineering models in a BIM-based environment.

- Contribute design information across varied project work.
- Work collaboratively with engineers and other project colleagues.
- Communicate technical information clearly throughout project delivery.

PROJECT DELIVERY

- Work across projects of varying scale, including major developments.
- Contribute to coordinated project delivery through design and model development.
- Use feedback and collaboration to develop practical engineering solutions.

REQUIRED EXPERIENCE

- A Civil Engineering degree or equivalent relevant qualification.
- Relevant capability in civil engineering and drainage design.
- Ability or strong interest in design and modelling within a BIM environment.
- Ability to communicate clearly in writing and conversation.
- Ability to contribute effectively within a project team.

APPLICATION
