MARA

Supporting Ohio: Economy, Energy, & Community

$267M

INVESTED IN OHIO[1]

$2.2M

STATE & LOCAL TAXES[2]

Empowering Ohio

At MARA, we are committed to powering Ohio's future by investing in infrastructure that delivers lasting value. Our data centers support local energy producers, strengthen grid reliability, create high-quality jobs, and generate tax revenue for communities across the state.

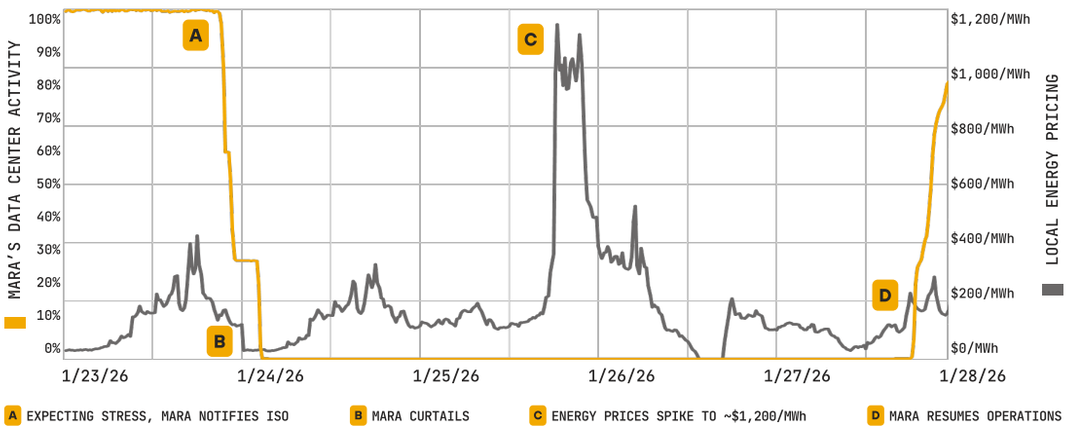

We operate in two Ohio counties, investing over $267 million in infrastructure and generating over $2.2 million in state and local tax revenues. As demand for digital infrastructure grows, MARA is well-positioned for expansion that could bring additional jobs and investment to the region.

Curtailing 770 MW to Support the Grid

MARA is a shock absorber for the power grid. Our Bitcoin mining data centers serve as large flexible loads, quickly adjusting power usage in response to grid conditions.

In January 2026, Winter Storm Fern stressed multiple U.S. power markets. To help stabilize the grid and free up power, MARA voluntarily curtailed roughly 770 MW across PJM, ERCOT, and SPP.

OUR VOLUNTARY DEMAND RESPONSE[3]

BUILDING LOCALLY

Our investments and tax contributions strengthen local economies and help fund essential public services.

CREATING JOBS

We create high-quality jobs that build technical expertise and drive economic activity in the communities we operate in.

SUPPORTING THE GRID

We power off during peak demand and scale up when energy is abundant, helping stabilize the grid and lower rates.

References

1. Capital invested includes the sum of investments in fixed assets since MARA started operations at each site as of February 2026.
2. Amounts represent taxes paid through 2025.
3. Data center activity reflect 550 MW in ERCOT & Pricing Data from ERCOT North Hub
