

Cable Ties + Inventory Replenishment Program

Automated Inventory Replenishment

Less downtime. Fewer stockouts. Zero hassle.

How the Program Works

Using your existing bins or shelving, adhesive barcodes are supplied for each SKU.

Scans route to your purchasing department or directly to your distributor and stock is replenished before shortages occur.

What the program delivers:

- ✓ Real-time visibility of on-hand quantities
- ✓ Re-order triggers at predefined bin thresholds
- ✓ Consistent, cULus-certified cable ties and components
- ✓ Controlled consumption and less over-ordering

Two Flexible Replenishment Modes

- 1 Internal-routing:** alerts flow to your procurement/ERP system
- 2 Distributor-managed:** auto-ship when bin thresholds trigger

Either way — stock is replenished before it becomes an issue.

Ask your distributor to deploy EdisonGrip™ + Inventory Replenishment

Guided deployment is supported by Edison Elm's product, supply-chain, and hardware/software team — from setup through ongoing replenishment.

About EdisonGrip™

EdisonGrip™ delivers certified electrical-infrastructure and wire-management products engineered for demanding commercial, industrial, and institutional environments.

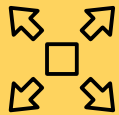

Our core values: **performance, consistency, supply-chain reliability** — for contractors and install crews who can't afford downtime.

CURRENT PRODUCT & SUPPLY PORTFOLIO

- Cable ties (standard, UV, stainless-barb)
- Mounting bases, fasteners & wire-management accessories
- Identification and bundle-management accessories

COMPLIANCE & QUALITY ASSURANCE

- cULus-certified cable ties & components
- RoHS-compliant materials across the product range
- Full lot/batch traceability, QA, and supply-chain documentation

COMING SOON:

Electrical tape, EMT fittings, wire terminals and lugs, along with additional high-volume consumables — expanding EdisonGrip™ into a broader contractor supply platform.

Powered by Edison Elm — Trusted. Reliable. Proven.

EdisonGrip™ is backed by the deep manufacturing, supply-chain capabilities and distribution network of Edison Elm. We connect OEMs, contractors, engineers, and distributors to quality-verified products — from specification to delivery — across North America.

Serving contractors, installers, and distributors with reliability, traceability, and supply assurance.
