

REACH SVHC Declaration

EdisonFlex™ Portable Cord

18 September 2026

EdisonFlex™ Portable Cord

Edison Elm declares that the tested IE4 insulation and EM7-P jacket materials documented for EdisonFlex™ Portable Cord contain no screened Candidate List substance of very high concern (SVHC) above 0.1% by weight.

Product and material scope

EdisonFlex™ Portable Cord encompasses the SOOW and SJOOW product families. This declaration addresses the SVHC content of the identified IE4 insulation and EM7-P jacket materials, as evaluated in the supporting laboratory reports.

REACH Candidate List assessment

The assessment references Regulation (EC) No 1907/2006 (REACH) and the 253 Candidate List entries through 4 February 2026. Independent laboratory reports issued on 26 August 2026 and 9 September 2026 record a pass for the insulation and jacket samples, respectively, with each screened SVHC below 0.1% by weight.

The declaration is limited to these insulation and jacket material assessments and the Candidate List scope identified above.

Basis and validity

Supporting laboratory reports are retained in Edison Elm's product compliance records. This declaration reflects the evidence available on the date of issue and is subject to review following changes to the Candidate List, material formulations or supporting compliance information.
