

■ WIRE & CABLE FOR EQUIPMENT MANUFACTURERS

Connections built into your equipment.

From the control panel to the production floor.
Panel wire, control cable and flexible power for your next build.

■ 01

Control panels

T90 Nylon and TWN75 conductors for wiring selected around the panel design.

■ 02

Equipment connections

TC, CIC-TC, flexible cord and armoured cable for control and power circuits.

■ 03

Production support

Just-in-time supply coordinated through our authorized distribution partners.

Where Energy Meets ExcellenceTM

■ T90 NYLON / TWN75

Wire for your panel designs.

Single-conductor wire for panel builders and equipment manufacturers, selected around the circuit, termination and assembly requirements.

■ THERMOPLASTIC WIRE / NYLON JACKET

600 V

PVC insulation

Copper & aluminum conductors

T90 Nylon

90°C dry

For dry-location wiring where the panel design calls for T90 Nylon conductors.

[Explore T90 Nylon +](#)

TWN75

75°C wet / dry

For applications specifying TWN75, with a 75°C rating in wet or dry locations.

[Explore TWN75 +](#)

COPPER RANGE

14 AWG-1000 kcmil

ALUMINUM RANGE

12 AWG-1000 kcmil

CSA C22.2 No. 75 | CSA Certificate 80271578

Panel wire. Practical support.

Our team helps evaluate conductor options, identification and supporting documentation around your panel design and production needs.

■ TRAY, CONTROL & ARMoured CABLE

Connections across your system.

Control and fixed power cable for equipment skids, production lines and industrial installations.

TC / CIC-TC

Control panels & tray wiring

Copper tray and control cable with PVC or XLPE insulation and an overall PVC jacket. Sunlight-resistant jacket constructions.

600 V | 14-10 AWG copper

CSA C22.2 No. 239 / UL 1277

[Explore TC +](#)

[Explore CIC-TC +](#)

TECK90

Fixed equipment & feeder circuits

Armoured power cable with XLPE insulation, PVC inner jacket, interlocked armour and PVC outer jacket.

600 / 1000 V | Copper or aluminum

CSA C22.2 No. 131

[Explore TECK90 +](#)

Application support from our team.

We help evaluate viable cable options against your operating conditions and project priorities, with supporting documentation to help identify the best fit.

■ SOOW / SJOOW

Flexible power. Defined duty.

Flexible cord for portable equipment, OEM connections and temporary power, with product selection matched to the operating environment.

■ PORTABLE POWER & OEM CONNECTIONS

SOOW / SJOOW

Copper conductors

Multi-conductor flexible cord

cULus | MSHA

SOOW

600 V

Flexible power for portable equipment and OEM applications requiring a 600 V cord family.

[Explore SOOW +](#)

SJOOW

300 V

Flexible power for portable equipment and OEM applications requiring a 300 V cord family.

[Explore SJOOW +](#)

Documentation to support your equipment.

UL 62 / CSA C22.2 No. 49. Flexible-cord certification records, plus RoHS and REACH SVHC declarations, are available through the product pages.

Support for your equipment connections.

Our team helps assess cable options around voltage, load and operating conditions, including movement and handling where relevant to the application.

■ CONFIDENCE FROM SPECIFICATION TO DELIVERY

Quality behind every reel.

We manufacture cable to defined product requirements, with quality controls, traceable records and documentation to support your equipment programme.

Quality & traceability

Our manufacturing controls include dimensional and electrical checks. Batch and reel records provide traceability from production through delivery.

[Quality assurance +](#)

Documentation for approvals

We provide technical specifications, test documentation and applicable product certification records to support engineering review and equipment approvals.

[Technical resources +](#)

■ ESG & RESPONSIBLE SOURCING

Responsible materials. Controlled production.

Environmental management

We integrate environmental management into production, using ISO 14001 frameworks to address energy use, waste reduction and compliance.

Responsible raw material sourcing

We assess our raw material suppliers for material quality, environmental practices and labour standards. Documented checks support responsible sourcing.

[Explore ESG & sustainability +](#)

Documentation that supports your programme.

We support engineering, procurement and environmental reporting with product information and documentation relevant to your equipment and market.

■ JUST-IN-TIME SUPPLY FOR OEM PRODUCTION

Supply that keeps pace.

We coordinate just-in-time supply through our authorized distribution partners, connecting manufacturing, inventory planning and scheduled delivery in a complete OEM supply chain solution.

■ READY FOR PRODUCTION

The right cable, in the right quantities, coordinated around your production schedule.

01 Demand-led planning

We work with you and your authorized distribution partner to plan supply around your bill of materials, expected usage and production forecast.

02 A coordinated supply chain

We align manufacturing schedules, lead times and inventory requirements with our authorized distribution partners to support a coordinated supply programme.

03 Just-in-time releases

Scheduled releases and delivery coordination follow your build schedule. As production needs change, we work with your distribution partner to adjust the supply plan.

A supply partner for your next build.

From cable selection and documentation to forecast volumes and scheduled releases, we work with your authorized distribution partner to develop a supply plan around your production needs.
