6/17/2024

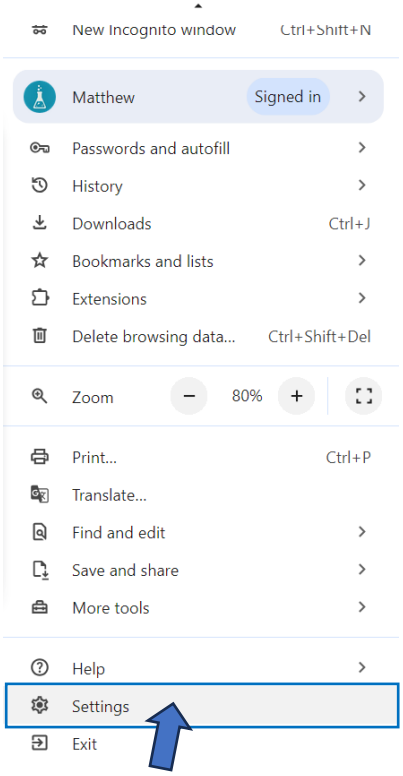

Background:

Some ScanLab users have noticed a lag when prescribing and manipulating slices within the app. This fix will help adjust your google chrome settings so that you can have a better user experience within ScanLabMR and ScanLabCT. Here's how.

1. **Select the icon with the 3 vertical dots:**

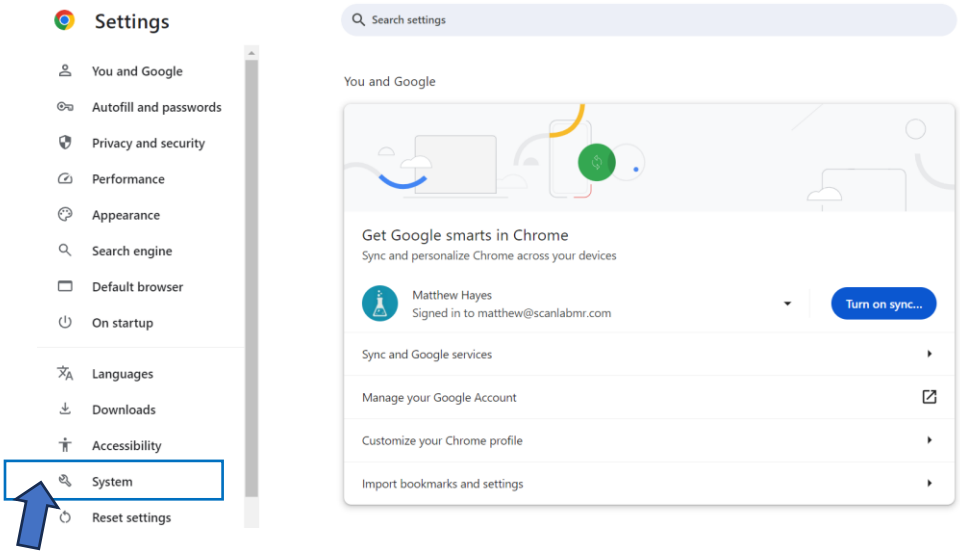

2. **Select "Settings" within the dropdown menu:**

3. **Select the "System" option with the wrench icon in the settings area.**

4. **Find the setting labelled "Use graphics acceleration when available" and de-select that option.**

5. **After deselecting the setting, relaunch the browser.**
