Cellular Capability Integrated GPS Always-on Display Apple Watch Series 5 is the latest iteration of smart wearables from Apple that succeeds the Apple Watch 4 series. With innovative fitness-related features and sensors that provide accurate data, the Apple Watch 5 series is now the best, fastest, and most reliable Apple watch ever. Design and build Quality Crafted from a single aluminum block, the Apple Watch 5 shows the best build quality a smartwatch can offer. The Apple Watch 5's app and finish is top notch, with Apple leaving no stone unturned to ensure perfection. The design is slightly improved by the Apple Watch 4 in terms of screen bezels that are now smaller than ever, leaving an edge aside OLED awesomeness worth worshipping. Sapphire glass takes the scratch resistance to the next level and keeps the display in pristine condition despite how rough you are going to handle the watch. Performance Powered from the brand new dual-core S5 chip, the Apple 5 watch range is 30% faster than its predecessor. The brand new high-performance processor allows Apple to add the SIRI voice assistant feature with voice feedback to this device. Display This smartwatch from Apple has a slightly larger 1.78 inch, 368 x 448 pixel AMOLED display that has a pixel density of 326 ppi. The screen looks sharp, feels vibrant and the brightness levels are great as well. Since the screen bezels have been significantly cut down, Apple has managed to include a larger screen under the same footprint of the Apple Watch 4. The OLED screen complements the Watch OS UI and takes full advantage of the app ecosystem to provide an immersive experience. Also, a neat trick with the Apple Watch 5 screen is always in the technology. This feature reduces the refresh rate of the Miscellaneous screen The Apple Watch 5 comes with 32 GB of internal storage compared to 16 GB in its previous generation. This smartwatch now comes with the ability to receive ECG, but the feature is declared to be released at a later date through a software update. The fitness tracking measurements from the sensors on this watch are exactly where they are and are the most accurate among all smartwatches market at the moment. The levels of improvement are very different with WiFi connectivity being 85% better than the 4 series and wireless energy efficiency being 50% better. Battery life and updates A 285 mAh battery ion battery enhance the smartwatch that lasts up to 1.5 days of continuous use on a single charge. This watch gives an estimated screen on time of about 18 hours which is very very taking into account the huge number of sensors and the large screen. The smartwatch works on Apple's latest WatchOS 5 with promising updates coming in the future adding more features in the long run. Verdict Apple 5 watches are the best possible money smartwatch they can buy on the market by now. The design, build quality and quality of the features built into this device are probably the best in the category. With well optimized hardware and software on board, this device is sure to stay running for you for at least two days continuously. Works best with Apple devices only Super 1.78 inch 368 x 448 pixels LTPO OLED GPS Yes Operating System Watch OS Water-Resistant Yes, up to 50m Battery Up to 18 Hours Society Shape Square Smooth and fluid UI Rotating dial navigation Missional brand Samsung has been in the smartwatch industry for so long that it almost owns the Android side of the market right now. The Samsung Galaxy is the company's latest addition to the flagship smartwatch section and rightly checks all necessary columns with ease. Display and build quality The Samsung Galaxy smartwatch 1.2 inch Super AMOLED display with a resolution of 360 x 360 pixels. The display is protected by a kind of Corning Gorilla glass specially designed for wearables. The raised front front front protects the screen more than accidental falls. The device itself is certified ip68 and can withstand water entry up to 5atm (50m). This smartwatch uses standard straps that are interchangeable according to the style the customer prefers to flaunt. The bezel in advance is rotating and this is connected to navigation through menus that feels very easy and intuitive. Hardware Features This device has all the usual set of sensors, such as a heart rate monitor, pedometer, and GPS. GPS can be used to track your movement while jogging or even casual trips. In others The built-in Samsung pay works very well that there is no need for your phone to make payments anymore. This smartwatch runs on Tizen OS that Samsung has developed based on a Linux kernel. Battery life The Samsung Galaxy smartwatch packs in a 380mAh battery that will last up to 80 days of continuous use on a single charge and up to 24 hours with GPS turned on all the time. The wireless charging base bundled takes about three hours to fully charge this battery from zero to one hundred percent. Verdict Samsung Galaxy smartwatch is one of the most practical smartwatches on the market. Loaded with Android Wear OS, this smartwatch features all of Google's goodies and more, thanks to game store certification. The rotating dial menu is so intuitive and easy to use without having to shake your fingers on the tiny screen. Without doubt in mind, we can say that this is one of the best Android smartwatches available in the Indian market at the moment. Display 1.2-inch 360x360 Super AMOLED GPS Yes Surgical System Tizen OS Water OS Water up to 50m Battery Up to 80 Hours Dial Shape Circle Stunning AMOLED touchscreen 14 days of battery life fitness features with accurate sensors on board Oppo is one of the most important players in the Indian smartphone market. Recently the company has ventured into the accessories department with their headphones and TWS headphones as well. The Oppo watch is the newly introduced Android Wear OS-powered smartwatch that looks remarkably like the Apple watch, but is available at a fraction of the cost at just Rs.12.990. Design and Build Quality The Oppo Watch looks and feels almost similar to the Apple Watch. The square dial is made of lightweight aluminum and the back of this watch has a shiny ceramic back. The application and finish of this high quality smartwatch scream right at first glance. The rubber strap is thick enough to be durable but feels comfortable to wear. There are two physical buttons on the right side of the dial - one of which is the power button and the other a multifunction button that can be customized to invoke various features, fitness options say. This 41mm Wi-Fi only model of the Oppo watch is 3atm waterproof and can withstand mild rains and splashes of water without any problems. Display Screen is one of the main USPs of this Android smartwatch budget. The Oppo watch features a 1.6-inch AMOLED touchscreen with a resolution of 320 x 360 pixels. Being an OLED display, blacks appear perfectly deep black and the colors seem to be punchy and vivid. The brightness levels of this screen are on the same level as the similar values of its competitors and can be used both indoors and outdoors. Thanks to the powerful Snapdragon chip inside, navigation through the UI feels buttery smooth and the panel offers good touch response. Since this is a square screen, typing answers and interacting with the UI is very relaxing and without many issues. Sensors This smartwatch carries many sensors on board for accurate fitness monitoring options. There is normal GPS for positioning and position tracking, accurate heart rate sensor for metabolism calculation, accelerometer for step counting etc. There are many pre-built fitness modes that you can use to keep yourself healthy. Various The Oppo smartwatch has a built-in microphone and speaker for hands-free calls via Bluetooth. You can track calls from your smartphone on this device and talk directly. The quality of voice calls is decent enough, to say the least. that this is an Android Wear OS-powered watch, you can access the Google Play Store and download apps of your choice for 8GB internal memory with ease. This premium affordable smartwatch also has NFC connectivity and supports wireless payments through Google pay. Battery Life Oppo claims this smartwatch will last up to 14 days on a single charge. However, with as always-up display enabled and normal GPS usage, expect the battery to come down within a few days. The proprietary magnetic dock charger that comes with this watch supports fast charging and can juice up the battery within 1-1.15 hours completely. Elegant and premium design S spread and comfortable Display 1.6-inch 320 x 360 pixels AMOLED GPS Yes Operationaling System Android Wear OS Water Resistant Up up to 3 atm Battery Up up to 14 Days Dial Shape Square Gorgeous OLED display Built-in GPS Up up to 2 days battery life Mobvoi is a brand you may never have heard of before. But remember, this is a name you're going to hear more often, thanks to the amazing composition of their smartwatches. Mobvoi Ticwatch S2 is a feature-rich, economical smartwatch that gives more than you want in the sub Rs.20,000 price section. Design and quality construction Mobvoi Ticwatch S2 is made of polycarbonate which is hard as well as lightweight. The soft silicone strap on this smartwatch is flexible and won't hurt easily over time. The rounded dial and the corresponding strap look premium in hand. By US military standards, mobvoi Ticwatch S2 is the best candidate for adventure junkies and travelers. This smartwatch is waterproof up to 5atm, which makes it usable outdoors in adverse weather conditions such as rain. Display The Mobvoi Ticwatch S2 features a 1.39-inch OLED display with a resolution of 400 x 400 pixels. The level of clarity and crispness that this screen offers is excellent and is pretty much unmatched for its price. Colors look vibrant, and contrast levels match the promise of an OLED table. Smartly designed black colored watch faces use the OLED display and offer significant battery savings in this respect. Features The Mobvoi Ticwatch S2 comes with a visual heart rate monitor to measure your body's metabolism. The accuracy of this sensor is decent enough for the price. Along with this, there are accelerometer, gyroscope and proximity sensors on this device that opens up a whole range of possibilities for improved usability. With the built-in GPS and electronic compass, you can easily track and record your paths with the accompanying app on your smartphone. Running on OS 2.0 wear based on Android, there is no lack of choice for applications. The full suite of Google services is present, including the Play store. The MediaTek processor inside and the 512MB RAM running wear OS smoothly without delays or stutters. Bluetooth v.4.1 connect the device to other low-power smartphones and constantly notify you of incoming calls and messages. Battery life Mobvoi Ticwatch S2 offers a decent battery life of up to 2 days on a single charge. Even if used heavily, this device should see the end of the day comfortably. Magnetic pin connector in bag easily pairs

with charging connector and begins With fast charging support, this device charges from a vacuum to 100% in just one hour. VerdictIf you want a premium smartwatch running on Android wear OS, but has a budget under Rs.15,000, you need to get the Mobvoi Ticwatch S2 without second thoughts. The OLED display, build quality and quality of the sensors inside make this a concrete deal that will never be lost. The Fitbit Versa 2 is a hybrid between a smartwatch and a fitness band featuring an interesting mix of both worlds in a compact wearable form factor. Design and build qualityThe fully anodized rectangular aluminum body stands out when you see the Fitbit Versa 2 for the first time. This dial consists of a control button on the left side that will help you select functions and navigate through the menus along with the responsive touch screen interface. This button is quite raised by the body and feels very tying and responsive. The silicone strap is thick and has a textured finish on the outside. On the inner side, the soft layer makes it feel comfortable wearing this device around the wrists. Overall, the Fitbit Versa 2 looks like a well-built fitness smartwatch that feels durable and solid. DisplayThe Fitbit Versa features 2 1.35 inch OLED panels to display the information. The display has a resolution of about 300 x 300 pixels and is relatively sharp compared to other smartwatches that belong to the same price category. The colors look vivid and the brightness levels are decent for the asking price. SensorsThe Fitbit Versa 2 has the most accurate sensors in this list of the best smartwatches in India.This device comes with a dynamic heart rate monitor that produces an accurate measure of your heart rate. SmartTrack mode allows this device to automatically record your workout, even without starting the setting. This smartwatch supports a plethora of sports activities ranging from jogging to swimming and measures statistics that can be easily seen and understood. The Fitbit app is very intuitive and with automatic sync turned on, you'll get your work report on your smartphone after each session. Miscellaneous Fitbit reverse 2 does not have a special GPS chip. This makes it impossible to track a location without a smartphone. The Fitbit Versa 2 comes with deep integration with the paired smartphone. Notifications from the phone will appear on the device, even from third-party apps like Whatsapp.Thee there are different watch faces to choose from, according to your preferences, and this will keep the watch looking new and refreshing every day. Battery lifeThe Fitbit Versa 2 has a decent battery life of about 5 days on a single charge. This device charges relatively quickly in just under 2 hours as well. The OLED monitor helps minimize power consumption, which is mainly due to the background heart rate monitor. You're a fitness freak and want to have a smartwatch that doubles as a fitness zone, the Fitbit Versa 2 is the best bet under an affordable budget. The OLED display is great, so it's fantastic battery life of up to 5 days. With precise sensors on board giving accurate metabolism measurements, the decision to I can't do anything wrong. Packed with fitness features, this smartwatch offers a flexible use that is worth the price it retails for. QualityHonor's design and construction has made no compromise with this smartwatch when it comes to build quality. Made of high quality stainless steel, this smartwatch feels durable and premium at hand. When you hear the word metal, don't think it's too heavy. The Honor 2 magic watch is lightweight and comfortable to wear, thanks to the extremely comfortable elastic strap and the weight balance of the dial. There are two buttons on the right side of the circular dial. The button at the top takes you back to the home screen from any menu if you press twice. The other button is user-customizable. You can assign a specific function to the button and access it with a single click. DisplayThe Honor magic watch 2 features a large 1.39-inch inch your OLED display. This screen responds a lot to the touches and assistants in easy navigation within the interface. Thanks to OLED technology, blacks appear as dark as possible and colors seem to pop up. With the numerous watch faces you can download via the accompanying smartphone app, customization options are plentiful. This screen has decent brightness and can be used outdoors without any problems whatsoever. FeaturesThe Honor magic watch 2 is powered by the Huawei Kirin A1 wearable chipset, which makes the whole experience a entire better. The animations are silky smooth and the overall daily operation will run as smooth as silk. This smartwatch comes with an ever-on heart rate monitor that provides accurate results. You can also get regular pedometer, sleep monitoring and even a stress level monitor. With built-in GPS + GLONASS support, you can track traffic independently of your smartphone. There are many sports functions to choose from to receive a wide range of data from training during the same. The Android smartphone app neatly determines the information from the watch in an intuitive way. Calls and speaker qualityThe Honor magic 2 watch features a built-in microphone and a small speaker. You can track calls through the when combined with the smartphone. The sound quality through the speaker and the quality of the voice through the microphone is very good, without noticeable distortions of sound. With the built-in 4GB internal storage, you can load songs and play the music directly, either through speakers or bluetooth headphones. Battery LifeHonor promises the magic watch to last for up to 14 days in a single single Battery life is very good with excellent standby time. Even with GPS turned on and used extensively, you can expect this smartwatch to last for 7-9 days. The clock charges through a magnetic swing that is easy and easy. VerdictThe Honor magic watch 2 is a game-changer for Huawei.Powered by the in-house Kirin A1 chip, this smartwatch offers smooth performance which is applied with the gorgeous OLED display. Stainless steel constructionSup 1.39 – inch OLEDGPSYesOpeting SystemCustom OSWater-ResistingYesBatteryUp to 14 DaysDial ShapeCircle Accurate GPSStunning OLED displayUp up to 20 days battery lifeHuami Amazfit T-rex is one of the recent newcomers from the Amazfit lineup to launch in the Indian market. Priced just under Rs.10,000, this is a rugged smartphone with impressive features, suitable for adventure junkies and fitness freaks. Quality Design and ConstructionThe Amazfit T-rex is rugged, an all-weather smartwatch that is battle-tested to ensure it follows twelve military-grade rigorous tests to operate without any failure, no matter the external conditions. Made of metal, the circular casing may look a little bulky, but the weight is manageable. Note that this smartwatch is best suited for those with reasonable wrist thickness. The silicone elastic strap is very comfortable and offers a comfortable fit around the wrists, there are four buttons - two on both sides of the watch dial to navigate the UI along with regular touchscreen controls. This smartwatch is 5atm waterproof and even has a special swimming function, which is a rarity among smartwatches in this price segment. DisplayThe Amazfit T-rex features a 1.3-inch OLED display with Corning 3 gorilla glass protection to avoid accidental scratches. Being an OLED screen, colors look vibrant and punchy and inky deep black add to the overall immersive watch face experience. The brightness level of this panel is on the same level as other competitors on the list and works perfectly fine outdoors under moderate sunlight. Huami has also given an anti-fingerprint coating over this screen to minimize smudges of greasy or sweaty fingers that appear on this screen from time to time. The touch response is at the point, without any noticeable delay whatsoever - thanks to the powerful processor inside. Hardware featuresThis premium budget smartwatch features a GPS chip that is very accurate in independent placement, without depending on a smartphone for the same. 14 different professional sports functions on this watch, including swimming, jogging, running etc that can be configured to track workouts without approaches. Normal step meter, sleep tracking and calorie counter are also present and accounted for. The dynamic heart rate sensor on the back of this smartwatch provides consistently accurate results as well. MiscellaneousThere are a plethora of watch faces to from this smartwatch. It also comes with the always-on feature, which will keep the display running at low brightness all the time. Notifications from your smartphone, including calls, text messages, and other apps, are delivered in real time without any delay. There's also the option to control music playback on your phone directly from your smartwatch. Battery lifeThe Huami Amazfit T-Rex is powered by a 360mAh ion battery that will last up to 20 days on a single charge. However, depending on the use of GPS, notifications and always-on screen, this number can be significantly reduced. It takes about two hours to fully charge this smartwatch from zero to one hundred percent. VerdictIf you want a rugged smartwatch that can accompany you anywhere without fear of being destroyed, the Amazfit T-Rex is a right contender under Rs.10,000.The OLED display and decent battery life along with rugged build quality makes this smartwatch a winner in its class. Up to 50m water resistanceNo for those with thin wristsManues1.3-inch AMOLEDGPSYesOpeting SystemCustom OSWater-ResistantYesBatteryUp to 20 DaysDeco formatC Up to 40 hours of battery lifeEgnty of sunlight legibilityBuilt-in GPS supportHuami is an independent smart wearable manufacturer with xiaomi support, popular for high accuracy, feature-rich affordable smartwatches. Amazfit Bip S is the entry-level smartwatch from Huami that has some nice tricks up its sleeve to impress users. Quality Design and ConstructionThe Huami Amazfit Bip S has a square shaped dial that combines with silicone strap material quite well. The application and finish of this budget smartwatch is unmatched in competition with other models in the same price category. Designed to fit both oversized and small-sized wrists politely, this smartwatch will match your style no matter your physique. DisplayAmazfit Bip Lite's display is interesting in many ways. This device features a 1.28-inch transreflective display with a resolution of 176 x 176 pixels. The speciality of this screen is that the screen becomes brighter and brighter with the amount of light hitting its surface. This is a great convenience when using the smartwatch under direct sunlight. When indoors, to enhance visibility, the background light starts. This is an ON color display that covers 64% of the RGB color gamut. Features All notifications from your smartphone appear easily on your smartwatch, but the only gripe is that you can't reply to messages. If incoming calls can be accepted at the touch of a wrist. Xiaomi Huami Amazfit Bip S is certified with IP68 which means it is waterproof and dust resistant. You can safely take this smartwatch with you as an all-weather companion. This smartwatch from Huami features the full fitness suite, including a heart rate sensor, and supports up to 10 different sports Huami PAI health assessment system comes integrated into this smartwatch for intuitive fitness data analysis. The Huami Amazfit Bip S features built-in GPS and GLONASS support for accurate location tracking. Battery lifeLife is the best aspect of the Huami Amazfit Bip S smartwatch. It will take you up to a whopping 40 days of continuous use on a single charge. As you've already guessed, the heart rate sensor is activated often, it will drop, but not too much. About 117 days of battery life on a smartwatch is too much to ask, isn't it? VerdictIf you want an all-weather smartwatch that will last for days on a single charge, the Amazfit Bip S is what you should check out. With the special monochrome display that gets darker with the increase in light hitting the surface, this is one of the most readable smartwatches you can wear outdoors. Huami PAI Health AnalysisPlayYes1.28-inch Transflective DisplayGPSYesOperating SystemCustom OSWater ResistantYesBatteryUp in 40 DaysDial ShapeSquare Smart notifications and fitness featuresSuperously in 28 days of battery life5atm water resistantHuami has released a load of shit smartwatches in the budget-conscious Indian market off late and to be fair, it was all awesome value and every penny. Amazfit Neo is a unique retro-style digital watch with some smart as well as fitness features baked into it. Quality Design and ConstructionThe Amazfit Neo has a square shaped plastic dial with a layer of thick rubber coating on top. The TPU strap is thick enough to be durable but feels extremely light and comfortable to wear as well. There are four physical buttons on the side of the square dial to navigate between the options available. The strap can be removed and replaced, but the lack of a quick release mechanism makes it a little more difficult. This smart digital watch is waterproof up to 5atm, so using it outdoors won't be an issue whatsoever. Overall, this smart digital watch from Huami has a strong build quality with a comfortable fit and finish. Display As we said earlier, this is basically a digital clock. The 1.2 inch LCD is similar to most other casio digital watches we are familiar with. This screen is always up and will not be turned off. There is blue backlit lighting to control the time at night or under low-light environments. The digits and icons look large and are quite easily readable from a distance. VariousThis Huami Amazefit Neo features a dynamic heart rate sensor on the back that exact number of heart rate. It can also accurately monitor your sleep and the data is neat for easy understanding in the companion smartphone app. The step counter seems to be very accurate as well, far from just 5-6 steps. There's no tinge feedback on notifications from your smartphone, but there's an option to set an audio signal every time a message arrives. Battery lifeFrom there Bare minimum material to drain the battery quickly, Amazfit Neo lasts for up to 28 days on a single charge. However, depending on subjective individual use, expect anywhere from 10-20 days with this watch. It takes about 2-2.30 hours to charge this watch from zero to one hundred percent. VerdictThe Huami Amazfit Neo is one of the unique retro looking digital watches with some clever functionality and fitness tracking baked into it for an exciting price of just Rs.2,299.Lightweight and comfortable bright blue LED backlightDisplay1.2 inch LCDGPS NoOpeting SystemCustom OSWater ResistantUp at 5 atmBatteryUp in 28 daysDycost ShapeSquare IP68 dust and water resistanceStomin 5 days of battery lifeGionee was once a prominent Chinese smartphone player in India , long before brands like Xiaomi and Vivo came to light in this part of the world. The Yionee Watch 5 is a clone of the Apple Watch that is economically priced under Rs.2,000.Design and Build QualityAs as we have mentioned before, this smartwatch looks and feels like a cheap clone of the Apple Watch. The silicone strap is comfortable and skin friendly and can be easily replaced if necessary. There is a side button under this watch that is pretty much no use other than a back button when navigating the UI. The Yionee Watch 5 is one of the lightest smartwatches on the submarine. Rs.5,000 price segment. You won't even notice the watch on your wrist, even if you wear it all the time. DisplayThis affordable entry-level smartwatch features a 1.3-inch IPS LCD with a respectable resolution of 240 x 240 pixels. This is a touchscreen with a decent response and fluidity for the price. Yionee has not mentioned anything about scratch resistance property but has included a screen protector in the box for extra security. The colors and contrast levels of this table look decent indoors, but this watch is pretty much average in terms of external readability. Featuring Adage to other smartwatches in this price range, the Yionee Watch 5 features a heart rate monitor to monitor body metabolism. This together with other ways of watching sports give a rough estimate of daily workouts and health conditions through the Yionee Life app. Smart real-time notifications work well on this device, with no noticeable delays. Battery lifeThis Yionee Smartwatch 5 is powered by a 160mAh battery that will last up to 5 days on a single charge. The proprietary pogo pin charger can charge the phone without removing the from the leash. It takes about two hours to fully charge this watch from zero to one hundred percent. Verdict if you're looking for an entry-level smartwatch that mimics the design of your Apple Watch, this is your best bet. With a year of warranty and decent performance, the Yionee 5 watch is well worth the asking price of just Rs.2,499.Lightweight and comfortable Outdoor Outdoor IPS LCDGPSNoActivation SystemCustom OSWater-ResistantIP68BatteryUp in 5 DaysDydy ShapeSquareSubscribe to our newsletter for the best lists and market guides.
