**Wellborn Cabinet, Inc. Presents Essex in Hickory**

Ashland, AL-Wellborn Cabinet, Inc. brings the beautiful Essex door style to our Hickory wood species. Essex is a traditional overlay, cope and tenon door style that has a veneer recessed center panel. To add extra details to the cabinetry, the standard one-piece drawer front enhances the beauty of this door style.

Essex is now available in the following wood species: Maple, Oak, and Hickory. These three wood species are trending for 2016. The beautiful Essex door style will now have the option to provide that distinctive light to dark contrasting characteristic, which Hickory is known for.

Essex in Hickory is available in Premier Series and Estate Collection as of May 2, 2016, and in the Elegant Bath Collection on July 11, 2016.
