Wellborn Cabinet Adds Davenport Door Style to Hickory

Ashland, AL-Wellborn Cabinet, Inc. announces the addition of the Hickory wood species in our Davenport door style. Davenport will add another transitional door style to the Hickory selections.

Davenport is a full overlay, cope and tenon door style with a raised solid wood center panel. The one step profile displayed on the Davenport door style presents a more transitional style. The Classic Drawer Front option is also available in Davenport. The traditional arch will be available along with the linear, square style.

Davenport is available in our Estate Collection and Premier Series line. The addition will also be made available on July 11, 2016, in our Elegant Bath Collection.
