

A Modern Minimalist Design

Wellborn Cabinet, Inc. will be revealing this gorgeous bathroom design at KBIS 2017. This high contrast, minimalist vignette features a small bathroom that maximizes comfort, space and aesthetics. This design features the new Full Access Frameless line, Aspire Cabinetry, by Wellborn Cabinet Inc. Available in the first quarter of 2017, Aspire Cabinetry is sure to add the finishing touches to the mountain of product currently available with Wellborn Cabinet Inc.

Here, Aspire Cabinetry was used to create a spa-like ambiance with upscale amenities that include ample storage and unique lighting. The contrasting character of a dark color framed by a light color adds elegance and sophistication to the room.

The Design

The base cabinetry was designed using Midtown Gloss Graphite framed with different white Arcadia Snow Oak elements. The boxed-in cubie area was created using shelving material made with Arcadia Snow Oak and made flush with the wall to create the desired inset look. Next, matching Arcadia Snow Oak base-end panels were added as well as an Arcadia Snow Oak recessed toe kick. To complete the look, lighting was added below the base cabinets, in the storage cubie area and behind the mirrors.

The visual framing affect continues with the Porcelain mirrors. Lastly, Mosaic tiles were added and extended to the ceiling to widen the space by means of optical illusion.

A Generous Amount of Storage

Each base cabinet featured in this vignette has been outfitted with an accessory, proving any small space can remain practical if used properly.

Adjustable Organizing Inserts
