Holiday Preparation: Cookware Storage

Conquer Doors

Although doors help keep dust out of cabinets, trying to manage them while grabbing items off shelves during food prep can result in broken objects, floor traffic congestion, and injuries. The best solution is to simply remove the doors. You won't have to struggle while cooking and the open shelving can make a kitchen feel more spacious and welcoming.

Speed Up Access

Searching for items in packed cabinets is another huge time waster. Save yourself hassle this holiday, and in the future, by storing items you need on a revolving lazy Susan in a corner cabinet near your prep area.

Improve Portability

A lot of people tire out while swapping prep tools. Put all the tools you'll need on the Hide A Mixer shelf and then move the rack into position near your prep area.
