This will reveal a cave that will give you a reward for the location of the lens magnification. It has two uses - one is to read a book in the Mabe Village library that gives you instructions you should take in the back of the jail, the egg of the wind fish. The second is to talk to a shop in Toronto Shores, which you find in a cave that you have to open on the beach. With a magnifier lens you can see and interact with a trader who can give you a boomerang in exchange for one of your items. This is especially useful for taking the seventh and eighth jails in the game. Don't worry, you can immediately buy the item back for 300 rupiah, so nothing is permanently lost! Lost!
