All of our fried foods are cooked in oil that contains soy as an ingredient. According to the FDA, highly refined oils, such as soy, are not considered allergenic

* Our foods do not contain tree nuts or peanuts as ingredients, but our suppliers may have tree nuts or peanuts present in the facilities where they prepare other foods supplied to us.

** All of our fried foods are cooked in the same oil, though we filter the oil to minimize cross-contamination from wheat. Nevertheless, we do not claim our products are gluten free.
